GOUDEN BI-CLASS SODA

A little history:

Soda Blasting was initially developed around thirty years ago in the United States to refurbish the copper-skinned Statue of Liberty. The icon's waterside location presented an environmental challenge, as traditional cleaning methods (sand blasting or chemicals) would have a harmful impact on waterways. Necessity being the mother of all invention, soda blasting was born!

Blasting with sodium bicarbonate (soda) is an environmentally-friendly, non-chemical, non-toxic, non-sparkling way that allows one to remove any residues without damaging its underlying surface. Besides that, soda also eliminates odor and polishes the surface during the blasting process.

SODA Blasting removes:

- ✓ Paints and epoxy
- ✓ Mould and mildew
- ✓ Grease, oil and fats
- ✓ Baked-on carbon
- ✓ Scale and slime
- ✓ Resurfacing Concrete
- ✓ Calcium deposits
- ✓ Bitumen
- ✓ Graffiti
- ✓ Chewing Gums
- ✓ Powder coating
- ✓ Glue and adhesives
- ✓ etc

FROM:

- ✓ Steel
- ✓ Class
- ✓ Copper
- ✓ Brass Bronze
- ✓ Fiberglass
- ✓ Aluminum
- ✓ Stainless Steel
- ✓ Ceramic
- ✓ Rubber
- ✓ Stone and Brick
- ✓ Most Plastics
- ✓ Most Timbers
- ✓ And many more

Advantages of GOUDEN BI-CLASS SODA:

- Non Toxic
- Odorless
- Non Sparkling
- Non Hazardous (Solvent-free, Acid-free)
- Non Harm to eye or skin
- 100% Food Graded (Hallal Certified)
- Non Flammable
- Non Corrosive
- Silica Free
- Moisture Resistant
- pH level is 8.4Max
- Biodegradable
- Water soluble
- Environmental friendly

Applicable Industries:

- Automotive
- Aviation
- Buildings
- Food & Beverages
- Machineries
- Manufacturing
- Military
- Municipal
- Oil & Gas
- Printings
- Refineries
- Restorations
- etc
