Company Profile

ABOUT SECURITY DOOR

A security door, also known as a safety door, means a door with upgraded safety features in terms of structure. The whole door is made of strong solid material and comes with 'safety pin' on it. The most important feature of a security door is equipped with a lock that resists forced opening within a specific time. **THC Metal Engineering Sdn Bhd (908703-V)** specializes in the production of security doors. They represent 'the door' of our profound professionalism and confidence.

CORPORATE PHILOSOPHY

With less than 20 years' presence in Malaysia, THC security doors represent a vast development potential, especially in the areas of structure and design, in which innovation awaits. We will be developing breakthroughs in 'structural design' and

'smart evolution' to make THC 'Beauty Outside Safety Inside'. Security doors are also a form of eco-friendly device. To make wooden doors, we need to fell a lot of trees, which tend to ruin the ecology. Hence the use of security doors to replace wooden ones can help conserve our environment.

VISION

The security door is an essential protective measure in this modern era. As an expert in security doors, we will keep pouring in resources to innovate our security doors, aiming to produce more security doors with high 'product stability'. The name of the game is to improve with the times and to stand on the pinnacle of home security trend.

Awards & Recognitions

Of all of our accomplishments, we take pride in greater performance, diversity, and innovation. We're honored to be recognized for our success as we continue our journey.

INDUSTRIAL DESIGN CERTIFICATE

Our effort into innovation of art design certified as decorative elements for door by Intellectual Property Corporation of Malaysia.

SME PLATINUM BUSINESS AWARD

The platinum Business Award optimizes the spirit of entrepreneurship and transformation as the way forward for companies in the new economy.

ASIA PACIFIC INTERNATIONAL HONESTY ENTERPRISE - KERIS AWARD

Honesty is the cornerstone of all success, without which confidence and ability perform, shall cease to exist. Honesty relates to both words and actions. Great companies and entrepreneurs delivering what they have promised to the customers, not only in the good times, but also in the challenging times.
