

PVC Foam Board

Product Informations

The Decorative Ability of PVC Foam Board

common know as PVC celuka foam board

Instead of supply PVC foam board, Enigma provide professional fabrication solution to PVC foam board to expertise its outstanding ability in advertising , architecture, and commercial markets.

PVC Foam Board (also know as PVC Celuka Foam Board) is a very common advertising and building material. PVC foam board is also called expanded PVC, and its chemical composition is polyvinyl chloride.

PVC foam board excels in being extra light weight due to its a foamcore board. Besides, it also has a very strong rigid structure, which makes it really light, easy to cut and shape, and also has high resistant to moisture and some chemical.

Advantages

- Main Characteristic -

01

Light Weight

02

Heat
Preservation

03

Water Proof

04

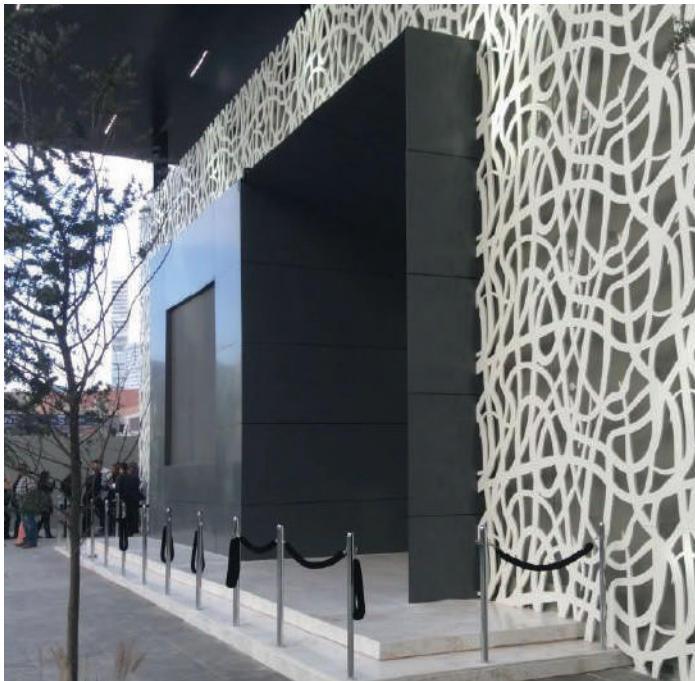

Acid & Alkali
Resistance

05

Mothproof

06

Sound
Insulation

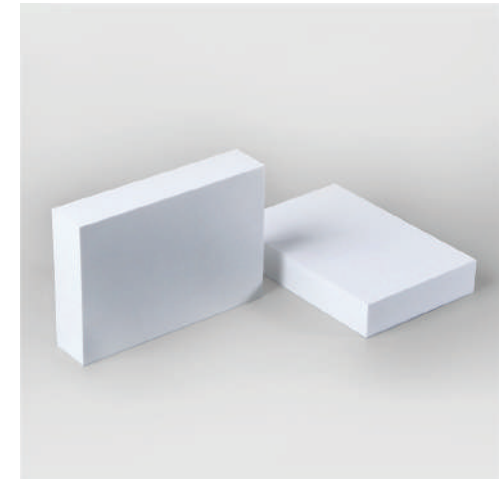

Outstanding Ability of PVC Foam Board

Its chemical properties are stable, Acid and alkali resistant! Moisture-proof, mildew-proof, thermal insulation, sound insulation, flame-retardant and self-extinguishing, smooth surface, mothproof and light, non-absorbent.
