I / We would like to attend the update session:

5<sup>th</sup> Feb 2013, Tuesday at CIDB Convention Centre, Kuala Lumpur  
 7<sup>th</sup> Feb 2013, Thursday at Auditorium Akademi Binaan Malaysia, Sarawak

**INTRODUCTION**

The Government is determined to work with the domestic iron and steel industry to make it more competitive.

MITI's Minister has described the restructuring of the steel industry as a matter of national importance, and that both the industry and the Government are assuming shared responsibility for its future. The industry and the Government will jointly undertake initiatives to further enhance the industry.

The Government has also agreed to cease the issuance of the Temporary Certificate of Approval (TCOA) effectively 1 month from the date of the press statement, which was issued on 22 January, 2013 and companies which are currently utilising TCOA may be considered for fast track clearance for a period of six (6) months. This 6-month grace period is to enable the companies to make the necessary adjustment in adhering to the streamlined processes for the importation of iron and steel products.

Thus, the seminar aims to update all affected importers of iron, steel and aluminium products to the new scope of implementation and to provide platform for the companies to highlight related matters.

**OBJECTIVE**

To provide latest updates:

- ◆ Importation procedure
- ◆ MITI's policies towards liberalization of iron and steel industry
- ◆ CUSTOMS new tariff lines for iron and steel
