

BOLD VISION

SLOGAN: **DOING MORE WITH LESS**

LEAN MANUFACTURING POLICY

BOLD VISION SDN BHD committed to apply Lean Manufacturing System and Practices to reduce costs, eliminate waste, increases productivity and maintaining high levels of quality through below:

- ❖ To promote Lean Manufacturing **Awareness and Training**
- ❖ To identify type of waste and **eliminate the waste**
- ❖ **Continuous Improvement** mind-set throughout the whole organization
- ❖ To **focus on adding value to the customer** by achieving lower cost, faster delivery, higher flexibility and better quality

We use several tools to create a successful Lean Manufacturing environment such as the **5S implementation**: Seiri (Sorting), Seiton (Simplify or Setting in order), Seiso (Cleanliness), Seiketsu (Standardizing) and Shitsuke (Self-discipline).

This process helps get all employees involved in organizing the workplace and keeping it clean. Maintaining standardized conditions and procedures are keys to achieving a world-class work environment.

Lean Manufacturing requires top-down commitment and bottom-up involvement to improve its manufacturing efficiency and responsiveness to customer demands, and to provide the best quality products and utmost service at the most competitive prices.
