

## Galebreaker Wind Shields

### Protection for personnel and equipment

Lightweight and strong, Galebreaker Wind Shields offer protection from the elements while maintaining a light and airy working environment. Single skin in construction with patented built-in tensioning technology, the PVC coated charcoal grey polyester provides 75% wind speed reduction up to a standard 90mph and maximum 120mph. Wind Shields provide protection against rain, dirt and dust.

Key Features	
Material	Polyester with PVC coating
Construction	Single skin with built in tensioning system
Colour	Charcoal grey
Steel Fixings	Marine grade (316) or galvanised
Characteristics	Wind, rain and dirt resistant
Protection	Protective wraps and safety wires
Temperature Range	-30°C to +70°C
Max. Temperature Exposure	70°C
Total Weight Including Fixings	1.25kg/m <sup>2</sup>
Weight of Material	Approx. 380 g/m <sup>2</sup>
Design Wind Speed	Standard 90mph, maximum 120mph
Fixing To	Client built subframe

### Fixings and Safety

All fixings are stainless steel marine grade (316 standard) or galvanised.
