

Cable Tray Heatshielding

Key features

- Designed to protect power and equipment cables from the effects of elevated levels of radiant heat
- Reduces heat flux by up to 74% (see typical **Heat Flux Reduction** chart below)
- Can be easily retrofitted and customised to suit any configuration
- Easily removable top cover for access and maintenance with optional grab handles if required
- Supplied complete with all insulation gaskets and fasteners
- Robust all stainless 316L construction
- Performance warranted
- Independently tested
- Indefinite lifespan under normal operating conditions
- Available in standard 1.5m lengths or purpose built per application.

Instrumentation covers and enclosures

Bespoke heatshielding can be supplied to protect instrumentation enclosures and other key equipment.

Radiant Temperature KW/m2		Reduction %
At front face of Heat Shield	At sides and top of cable tray	
3.15	0.80	74
4.73	1.40	70
6.30	1.70	72
9.50	2.70	72
