

Storm® Securable Good solution for rodent control

BASF Pest Control Solutions

- Single feed flocoumafen efficacy
- Palatable and durable block with a central hole
- Easy and secure to use
- Good cost pulse baiting

Enabling the good effective solutions to your pest problems.

Single Feed Flocoumafen Efficacy

Storm® Securable delivers the proven power of single feed anticoagulant rodenticide, flocoumafen, to Pest Control Professionals all around the world.

Flocoumafen delivers a lethal dose in a single feed for the best possible control. It is also effective against rodents and particularly valuable for controlling difficult rodent populations.

Palatable and Durable Block

Storm® Securable is formulated as a crushed grain and wax block containing 0.005% flocoumafen.

Extensive professional use has shown it to be good palatable to rats as well as good durable for the greatest efficacy in even the most challenging warm and wet environments.

Easy and Secure to Use

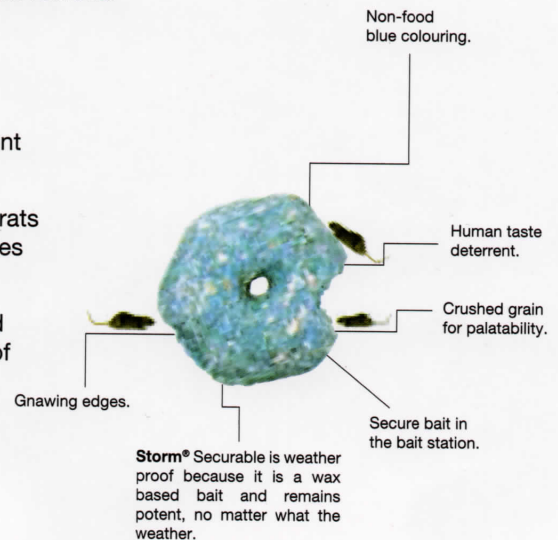

Storm® Securable makes it quick and easy both to put out fresh bait in pre-measured doses and to retrieve any unused rodenticide at the end of baiting. A central hole allows each block to be anchored securely in baiting points for the best targeting and to prevent removal and the risk of foodstuff contamination.

Pulse Baiting

Storm® Securable can be used in pulse baiting programmes involving strict amount of baits put down in successive cycles.

This ensures a reliable population control by allowing less dominant later-feeding rats sufficient access to the bait once their more dominant early-feeding contemporaries are dead or dying.

As well as requiring less bait than the traditional surplus baiting regimes employed with multi-feed rodenticides, pulse baiting significantly reduces both the amount of bait needed and the time required for baiting, leading to valuable total treatment cost savings.

This leaflet is intended as advice.

The recommendations for use provided with each product should be carefully observed.

Storm® Securable is a registered trademark of BASF.

Storm® Securable contains flocoumafen.

Use biocodes safety.

Always read the product label before use.
