WHY YOU SHOULD LEASE
INSTEAD OF BUY?

IT HARDWARE SUPPORT

We provide IT hardware support without service charging.

LOW COSTING

Large capital is not needed. (ie: RM2/day for a 6 months rental period). No interest charge!

Especially during this tough times, cost saving is a priority task to most of the businesses. You can complete your task on time with a rented computer but you won't double up your performance with a purchased computer.

DEPRECIATION

Computer depreciated at 33% per annum. The way to create a greater value is to save the cost from renting instead of buying.

FLEXIBLE TERM

Even it's just for 1 day use!

HASSLE-FREE

Free computer upgrade every 2 years.

WHAT IS A POS SYSTEM

If you're looking for retail software or restaurant software to run your business, then you're most likely looking for a POS system.

A POS system or point of sale system is a computerised network operated by a main computer, which is linked to checkout terminals.

It's simply a system that helps your business complete sales transactions.

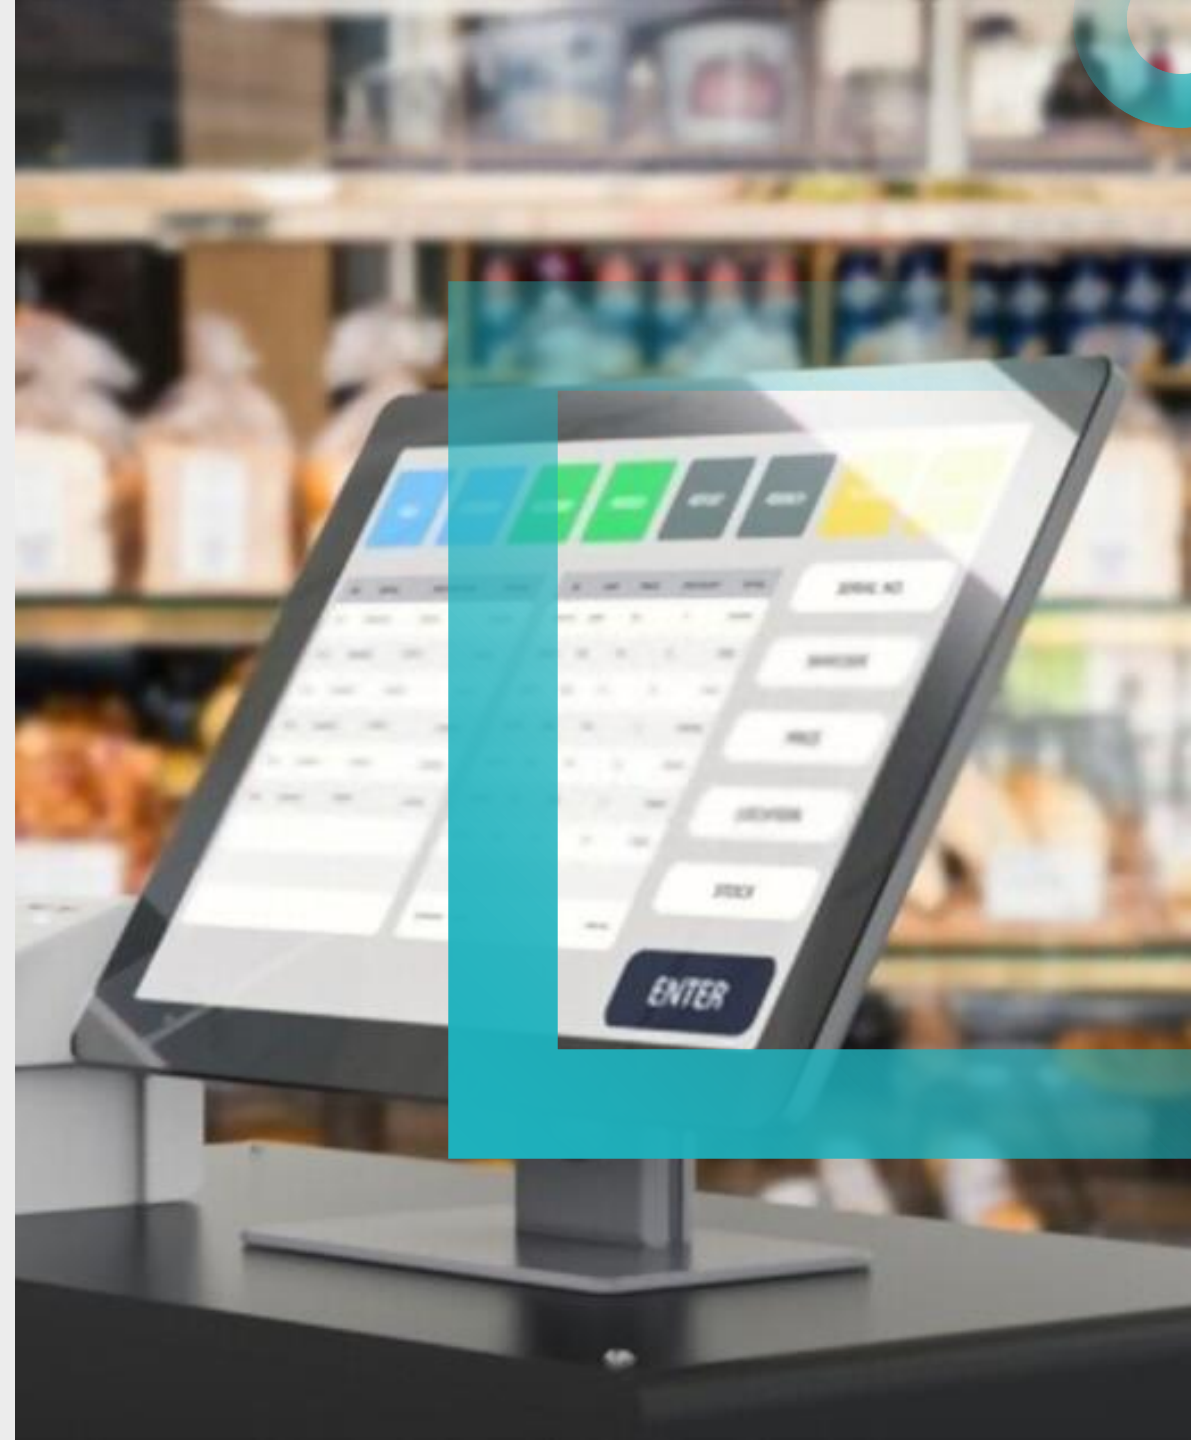

You can think of it like a superb cash register.

But then again, soon there won't be cash registers anymore, because POS systems can do so much more than just process payments. We'll talk about this in a bit. Keep reading...

A POS system consists of POS software and hardware such as:

- POS software
- POS machine/monitor/touchscreen/tablet
- barcode scanner
- receipt printer
- credit card terminal
- cash register

Sounds like a lot of stuff to put on your counter, but not to worry. Times are modern now, and POS systems are more modern and sleeker than ever.

WHY CHOOSE US?

**Go
Green**

**Reasonable
Price**

**Product
Quality**

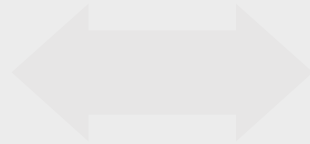

**Customer
Satisfaction**
