## C <br> FixQuick

## Ultra-fast Leak Stop

- Ultra-fast: takes just 20 seconds to repair refrigerant gas leaks up to 1 mm .
- Pressure resistance:

20 seconds to fix up to 20 bar (290 psi)
20 minutes to fix up to 50 bar ( 725 psi )

- Resists up to $250^{\circ} \mathrm{C}\left(482^{\circ} \mathrm{F}\right)$.
- Easy to use: STEP 1 - liquid with brush; STEP 2 - powder.
- Can be used on metal and plastic components.
- Can be applied on flat, curved, horizontal or vertical surfaces.
- Ideal for urgent repairs.
- Ideal for repairs where welding cannot be carried out.
- Permanent result.
- Visible with any UV lamp: it allows you to pinpoint and check the condition of previous repairs.

## External

## Two-component Putty Leak Stop

- Repairs refrigerant gas leaks up to 5 mm .
- Ideal for urgent repairs.
- Perfectly adheres to metal (copper, aluminium, and steel) and rubber components.
- Can be used on thermoplastic pipes.
- Resists refrigeration lubricant (mineral, POE, PAG, PAO and Alkylbenzene).
- Resists refrigerant gases (CFC, HFC, HCFC, CO2, including R32 and R1234yf).
- Resists additives and flushing fluids, including chlorinated ones
- Temperature range use: $-100^{\circ} \mathrm{C}$ to $+270^{\circ} \mathrm{C}\left(-148^{\circ} \mathrm{F}\right.$ to $\left.518^{\circ} \mathrm{F}\right)$.
- Can be used on either the high or low side of HVAC/R systems.
- Different pressure resistance depending on the size of the leak: $5 \mathrm{~mm}=40$ bar (580 psi) $-2 \mathrm{~mm}=50 \operatorname{bar}(725 \mathrm{psi})-1 \mathrm{~mm}=57 \operatorname{bar}(826 \mathrm{psi})$.
- Easy to use: it can be easily mixed by using two fingers and, once applied, it permanently repairs the leak in 4-5 hours.
- There is no risk of product dispersion in AC/R systems
- Once dried, it can be easily sanded or removed.

## EXTERNAL P

is the two-component putty leak stop specially formulated for plastic components of air conditioning and refrigeration systems and plumbing applications.
