DIRECTIONS FOR USE

GENERAL INFORMATION

QUALIBRA is a wetting and water conservation agent that has been developed to help in the management of water in turfgrass root zones, and to help prevent dry patch (localised dry spot).

QUALIBRA comprises a dynamic penetrant and a powerful polymer. The penetrant component drives more efficient water movement and distribution within the root zone; while the polymer component holds moisture deeply and evenly within the root zone. It is designed for use on all areas of golf courses, sports fields and other amenity turf areas.

QUALIBRA is well tolerated by all major turf species and allows more uniform distribution of moisture throughout the root zone. Following application water conservation effects occur throughout the root zone and not just on the surface or thatch layers. For optimum turf quality QUALIBRA should be used in conjunction with turf management practices that promote good turf health.

RESTRICTIONS

Prevent spray drift onto surrounding areas.

SPECIFIC INFORMATION

Apply Qualibra as a preventative programme to prevent the development of dry patch (localised dry spot)

Rates of Use

Apply Qualibra at a rate of 20 L/ha in a water volume of 400-1000 l/ha.

Timing

Apply QUALIBRA at approximately monthly intervals in a preventative programme to prevent the development of localised dry spot and aid water management.

QUALIBRA can be applied throughout the year if required.

MIXING AND SPRAYING

Make sure the sprayer is clean and set to give an even application at the correct volume and an even deposit. Half fill the spray tank with clean water and commence agitation. Add the required quantity of QUALIBRA to the spray tank. Complete filling to the required volume and continue to agitate throughout the spraying operation.

Do not leave the spray liquid in the sprayer for long periods (such as during meal breaks or overnight). Make up only the amount of spray required for immediate use.

Thoroughly wash all spray equipment with water immediately after use.

Best Practice

As part of our Product Stewardship policy, Syngenta recommends the following precautions should also be observed: wear appropriate clothing – coveralls and protective gloves – when handling the concentrate.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre. Emergency Hotline Number: +65 6334 4366

Have the product container, label or Material Safety Data Sheet with you when calling the Syngenta emergency number, a poison control center or physician, or going for treatment.

Mildly irritating to the eye. If in eyes: Rinse immediately with plenty of water, also under the

eyelids, for at least 15 minutes. Remove contact lenses. Immediate medical attention is required.

If inhaled: Move the victim to fresh air. If breathing is irregular or stopped, administer artificial respiration. Keep patient warm and at rest.

If on skin: Take off all contaminated clothing immediately. Wash off immediately with plenty of water. If skin irritation persists, call a physician. Wash contaminated clothing before re-use.

If swallowed: seek medical advice immediately and show this container or label.
DO NOT induce vomiting.

MATERIAL SAFETY DATA SHEET

If additional hazard information is required refer to the Material Safety Data Sheet. For a copy phone +65 6333 6400

DISCLAIMER

This product complies with the specifications in its statutory registration. Implied terms and warranties are excluded. Syngenta's liability for breach of the express or any non-excludable implied warranty is limited to product replacement or purchase price refund. The purchaser must determine suitability for intended purpose and take all proper precautions in the handling, storage and use of the product including those on the label and/or safety data sheet failing which Syngenta shall have no liability.
