

Quick Reference Guide

In accordance with ASTM A956 and DIN 50156 Leeb testing standards

Getting Started: 3 Simple Steps

Loading
 Slide loading tube
 back and forth to
 power on and load
 the device.

Positioning
 Place support ring firmly on the surface of the sample.

Measuring
 Slide the loading tube a short distance downwards to trigger an impact.

Averaging a Series of Measurements

- 1. Press D to initiate series.
- Start measuring: After each impact, display will indicate number of impacts done (max. 99).
- 3. Use to cancel current measurement (counter will decrement).
- 4. After last measurement, press

 as follows:

 average value.
- standard deviation*
 range*
- min.*
- max.*
- number of values
- hardness scale
- material group.
- 5. For another series, continue testing otherwise press <a> twice to exit series mode.

Choosing a Material Group and Conversion Scale

| Material Group | HV | НВ | HRC | HRB | HS | Rm* |
|---|------|------|--------|------|------|------|
| ∏ ☐ Steel and cast steel | D/DL | D/DL | D / DL | D/DL | D/DL | D/DL |
| ☐ 2 Cold work tool steel | D/DL | | D/DL | | | |
| ☐ ☐ Stainless steel | D | D | D | D | | |
| ☐ Ч Cast iron lamellar graphite GG | D | D | D | | | |
| 76 5 Cast iron nodular graphite GGG | D | D | D | | | |
| RG B Cast aluminum alloys | D/DL | D/DL | | D | | |
| Copper/zinc alloys (brass) | | D | | D | | |
| ☐ ☐ CuAl/CuSn alloys (bronze) | | D | | | | |
| ∏☐ ☐ Wrought copper alloys, low alloyed | | D | | | | |

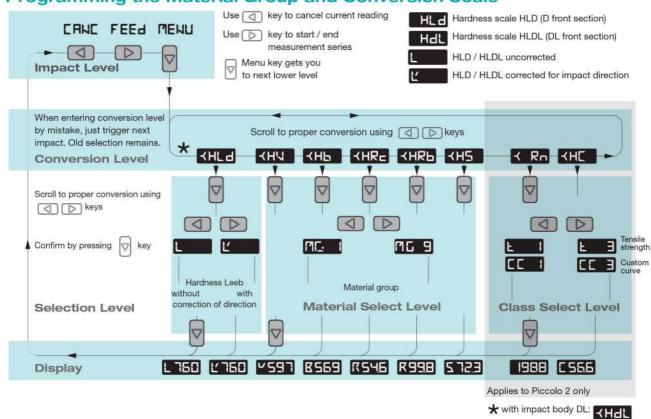

^{*} Applies to Piccolo 2 only
