

FIRE BLANKET BARRIER FROM 100 MM TO 500 MM JOINT WIDTH

FOR SEISMIC EXPANSION JOINTS

IMPERIAL SYSTEM PRODUCTS

FLAME BLOCK 78 is designed for Seismic or Earthquake expansion joints which would have generally a much larger joint width than expansion joints in areas not affected by earth tremors.

It prevents the spread of flame through these wide expansion joints and would have a 2 hour fire rating.

TECHNICAL DATA

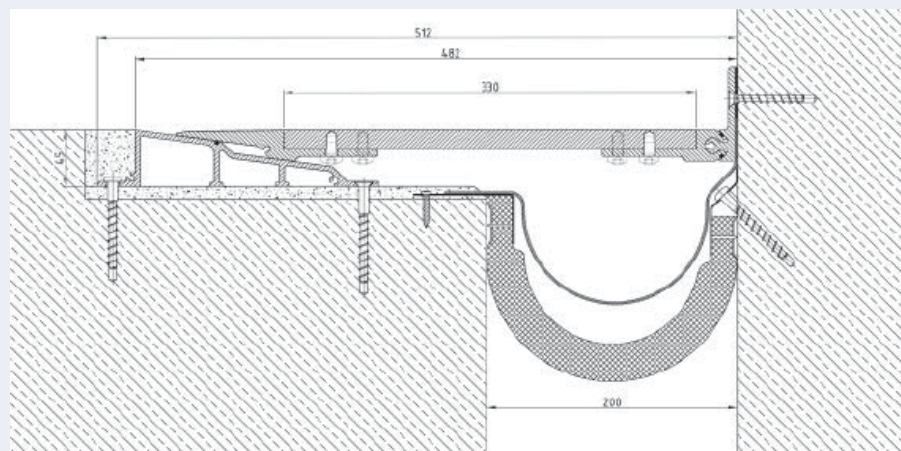

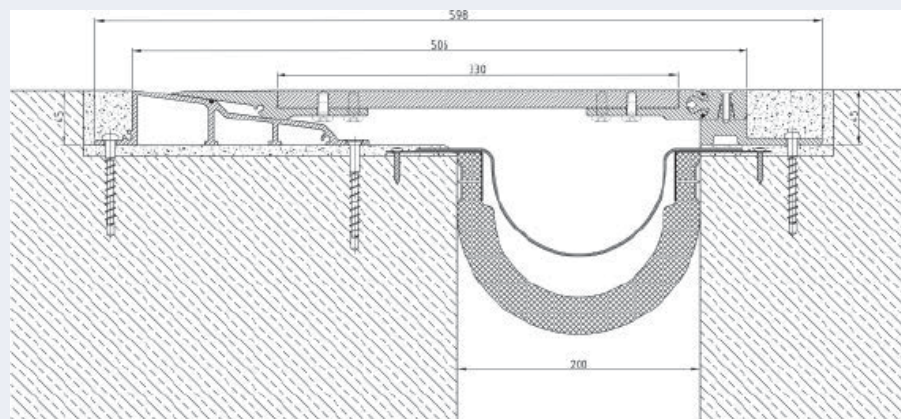

- UL 2079 - 2 hour rating
- 50% Dynamic movement

KEY FEATURES

- Accommodates dynamic movement
- Can be integrated with most of the expansion joint cover models.
- Caulk-free application
- Factory formed transitions
- Easy to install.

APPLICATION

- Designed for floor and wall joint gaps
- For 2 hour fire rated requirement
- Suitable for gap sizes from 1" to 20"
