ISOduce®
Ovarian Care Essence

Integrated Ovaries Protection

An optimal wellness for women

*The pursuit of beauty & health is
clearly a lifestyle for women*

Ovaries are the organs that play an important role in women's appearance, body and happiness.

They are vital as they are like the second 'heart' for the women

The Source Of Power For Women

Why Should You Keep Your Ovaries Healthy?

Healthy ovaries allow women to stay young!

Women's Source of Power

Besides producing and releasing eggs, another main function of ovaries is to

Produce Female Hormones

The aging ovaries will lead to aging skin, fat accumulation in certain parts of the body, endocrine disorders, premature menopause, and abnormal menstruation.

Healthy ovaries can help to regulate women physiological functions, maintain endocrine system and most importantly preserve women's attractiveness.

ISOduce[®]

Ovarian Care Essence

Let Your Ovaries Always Stay Healthy

An Exclusive Care for Women

5 CORE STRENGTHS

1. Combination of Chinese and Western Ingredients

Employ soy isoflavones (phytoestrogens) with traditional herbal (Manjakani, Kacip Fatimah, Pueraria Mirifica, etc.) to achieve a more significant effect.

2. Advanced Manufacturing Technology

Micronization Technology is used to crush the raw materials to preserve the active ingredients. To ensure the preservation of active ingredients and enhance the absorption rate of ingredients in the human body, all ingredients will thereafter go through the Ultra-low Temperature Drying Technology.

3. Use Only Non-GMO Soybeans

Strict selection of high-quality natural soybeans, utilize non-genetically modified soybeans in order to ensure it is safe for consumption.

4. Quality Assurance

Passed the certification of not containing any heavy metals, microbial, preservatives and chemicals.

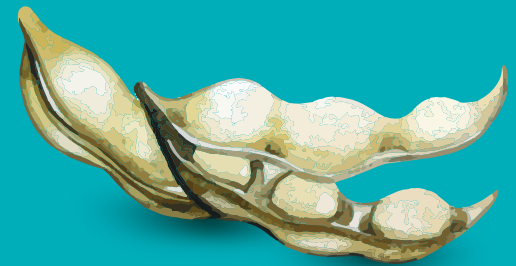

5. Trustworthy Brand

Won several International Award, such as Best Healthcare Brand of the Year 2018 in International Prestige Brand Award, Asia-Pacific Super Health Brand Award, etc.

“ **Soy isoflavones** are compounds found mostly in soy. It can mimic and serve the similar function as the female hormone estrogen, therefore also known as **PHYTOESTROGENS** (*Plant Estrogen*)

Phytoestrogens can benefit a wide variety of body systems, including hormone secretion, metabolism, active growth factor and etc. ”
