

INSPECTION, REPAIRS, TESTING & FABRICATION

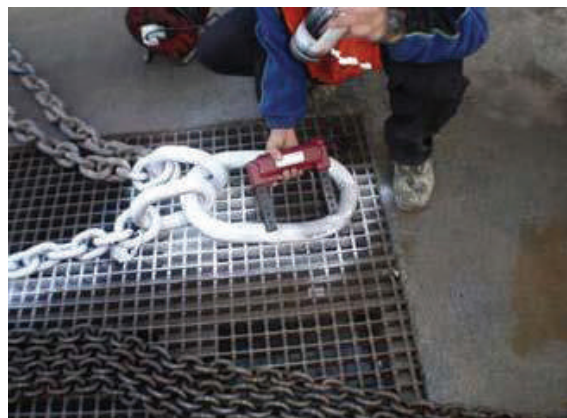

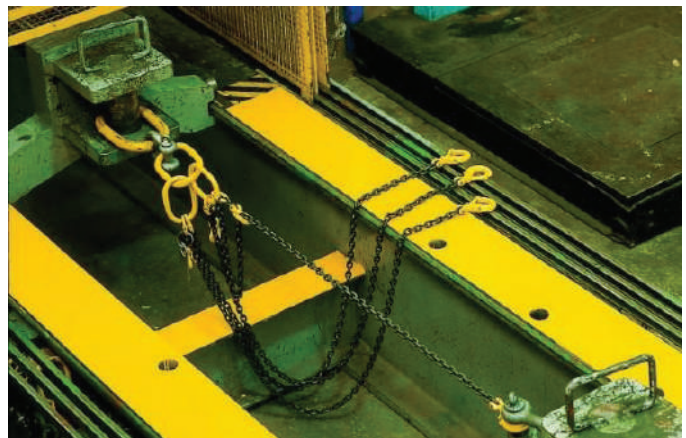

INSPECTION, REPAIR & TESTING

SUN HEAVYLIFT offer a comprehensive testing service on all lifting and rigging equipment. Tests are performed in accordance with relevant International Standards, with test facilities of up to 300 tonne available. We offer a complete testing/certification service for the following items, (but not limited to).

- Wire Rope Slings
- Chain Slings
- Flat Webbing and Round Slings
- Fibre Rope Slings
- Winches
- Shackles
- Chain and lever Hoists

SUN HEAVYLIFT offer a comprehensive inspection service covering all lifting and rigging equipment. Inspections and repairs are conducted by our qualified inspectors and provide reports detailing current status of all equipment. Our qualified staff will program regular inspections to suit your requirements. Visual inspections of wire rope slings, chain sling, webbing and round slings and round slings and spreader bars can be performed as required.

SPOOLING SERVICES

SUN HEAVYLIFT offers a fully comprehensive wire rope system removal, installation, change-out and inspection service.

Substantial investment, combined with thorough and continuing market research ensures that we have the very best equipment available to suit any work scope requirement.

Our team of experienced personnel is highly trained in the methods and procedures for handling, installation and removal of wire rope and cable systems.

Our constant tension units enable wire ropes to be fitted correctly, resulting in the best performance and maximum achievable service life.

Our spooling machines can be rapidly mobilised at short notice and taken to where our clients are working, and specially qualified personnel are available to respond to clients' needs.

WATER WEIGHT TESTING
