

IS YOUR FIRST STEP  
IN SECURITY

Mid range. Small price.

No more hand getting wet  
during the rainy day

## AR200U

Our EXRF penetrative technology allows you to flash card comfortably from inside of your car without wind down your window

New version  
**EXRF**  
Extended RF  
Technology

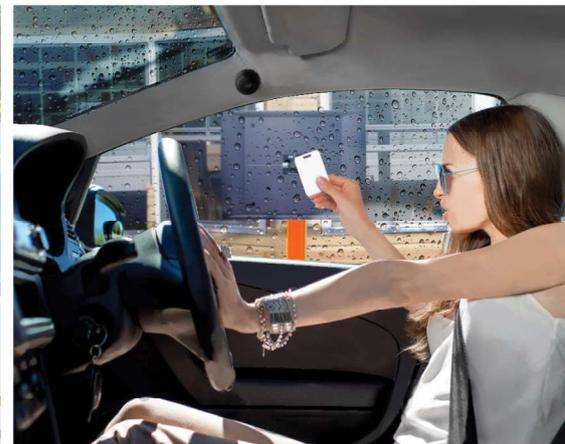

- ✓ Make your lifestyle more convenient.
- ✓ More affordable passive card - does not require battery.
- ✓ Decrease risk of robbery at car point.
- ✓ Add premium prestige reputation to your residential or commercial building.
- ✓ Reduce overall system cost. No need to install expensive awning or shade which is not effective during heavy rain. Awning also require maintenance.

### CDS18L Mid Range Card

Reading range 70 cm to 120 cm

EXRF enhanced 125Khz  
passive proximity card

## Features

### Extended range at affordable price

MAG AR200U is an extended range 125kHz RFID proximity reader. AR200U can effectively penetrate solar film and allows CDS18L mid range proximity card to be read from inside the car without winding down windows. CDS18L does not require battery therefore it is more affordable and no maintenance. You can truly enjoy the benefit and convenience of our EXRF technology.

### RF interference indicator

LED display indicates level of RF interference at site. LED display makes it easy to determine best location with minimum interference for reader installation. This helps you to install the reader at correct location and achieve full potential reading range at every site.

### Auto tuning function

Built-in advanced circuitry that will automatically tune frequency shift to compensate the presence of metal and interference at site. This ensures that you always get optimum performance achievable at site.

### Standard Wiegand data output

AR200U sends out card number via standard Wiegand (WG26, WG34, WG40) interface output that is supported by most access controllers in the world.

\*Final achieved reading range will depend on type of solar film installed and site noise interference.

## Accessories

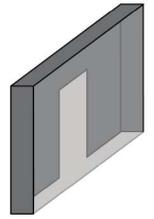

Gooseneck  
GSSD

Surge Protector  
PD24/7.5, PSP24, TP-LAN

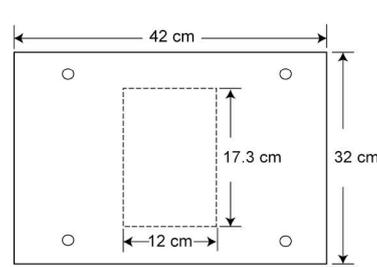

Weatherproof Housing  
AR200HSE

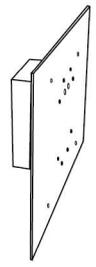

### Mounting Bracket - AR200BKT

Acrylic Mounting Bracket to mount AR200U to Gooseneck

## Wiring Diagram

## Specification

Data interfaces	Wiegand 26, 34, 40 bits selectable by wire connection
Nominal reading range with CDS18L (Reading range cannot be guaranteed if not using CDS18L)	70 to 120 cm depending on type of solar film and noise interference at site
RFID (proximity) cards accepted	125KHz, 64 bits, Manchester encoding
Operating Temperature range	-10 to +60°C
Dimensions	430 x 320 x 45 mm
Packing carton dimensions (with power supply)	480 x 480 x 110 mm
Gross packing weight (with power supply):	2.3 kg
