

# Access Management Software

made smarter for you!

## About

EastWin is a Windows-based access management software that supports ELID standard access controllers such as EL363, EL373, EL1335, EL1375, EL2205, EL2311, EL2307 and EL2800. It provides graphical user interface for data entry and information retrieval thus offering an easy way to manage security of up to 128 doors.

. . . . . . . . . . . . . . . . .

EastWin is designed as a total access management for door, car park, turnstiles and lift control. It also comes with a useful and straightforward timesheet feature to generate time attendance reports for HR use. EastWin uses MS SQL database engine that is able to manage large numbers of doors, card holders and transactions data. The SQL engine has proven robustness and reliability, delivering high performance and scalability.

EastWin offers an intuitive way of setting up an access control system. Much of the configuration is automated, and an installer can quickly set up a new access control system with minimal effort. Users will also experience a totally new and easier way to operate the access system with minimal learning effort.

#### Transaction

Auto Detection

## Features

## Central Control

Administrator is able to manage the whole system from EastWin. All commands such as controller settings and staff database can be executed with a few clicks. Staff movement and status of every controller can be viewed in real-time.

### System Security

Operator's access into Eastwin is by Username and Password. Operators can be assigned different access rights. Each level of access right entitles them to execute selected commands assigned by the administrator. Every logon and operator actions are recorded in the events log for audit trail checking.

#### Installation friendly

EastWin is designed to be intuitive to use and a wizard manages the installation. SQL installation is automatic for PC that does not already have MS SQL database. Auto controller detection and auto connection checking is provided to minimize hassles during configuration.

## Intelligent Graphical User Interface

EastWin incorporates Intelligent Graphical User Interface with simple menu view. All the functions are visible and accessible from an all-in-one central control screen.

### Operation friendly

The software is designed for ease-of-use. Complex functions like staff database management and accessibility assignment are performed easily and intuitively. Minimal technical support and fast learning curve are the objectives of EastWin.

### Database Management

EastWin allows the administrator to access staff database to edit department, designation, access level and expiry date. Administrator can filter, generate and save staff movement reports in PDF with just a few clicks.

## Transaction Record

EastWin provides real-time as well as archived records of door transactions for ease of monitoring and checking. A wide variety of transaction reports can be filtered, generated and stored in PDF/Excel file on the fly.

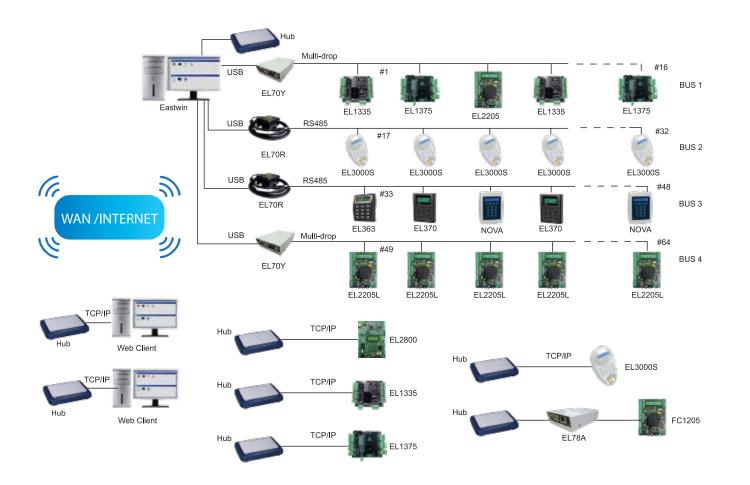

#### Time Attendance Report

EastWin comes with Chronos Time Attendance module that extracts first-in and last-out data from the access management readers. Chronos can generate 18 different management reports such as Late-in report, Early-out report, Absenteeism report and Attendance Summary.

# System Requirements

Computer	Pentium Dual-Core or higher				
Operation System	Microsoft Windows XP, Vista, 7 or higher				
Memory (RAM)	Minimum 1GB				
Hard Disk Space	100MB (Installation), 1GB (Operation)				
Communication Port	Serial Port or USB Port				
Database	Microsoft SQL Server 2005 or higher
