

3.5 MPa hydraulic cylinder

- Switch Set Cylinders with bores from 32 mm to 100 mm are standardized.
- For magnetic proximity sensor, the selection of small, reed sensor or solid state sensor type is available. The solid state sensor, 2-wire 2-LED type, facilitates setting at the optimum position (green lighting). WR and WS type sensors are also mountable (semi-standard).
- U-seal is used as the standard piston seal.
- For cushion structure, the metal fitting system is adopted.

Standard Specifications

| Type | Standard type | Switch Set |
|-------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------|
| Nominal pressure | 3.5 MPa | |
| Maximum allowable pressure | 4.5 MPa | |
| Proof test pressure | 5 MPa | |
| Minimum operating pressure | 0.2 MPa or less | |
| Piston seal | U seal | Slipper seal |
| Working speed range | 8 to 300mm/s | 0.1 to 300mm/s |
| Working temperature range (ambient/fluid temperature) | -10 to +80°C (No freezing) | -10 to +70°C (No freezing) |
| Structure of cushioning | Metal fitting system | |
| Adaptable fluid | Petroleum-based fluid (When using another fluid, refer to the table of fluid adaptability.) | |
| Tolerance for thread | JIS 6g/6H | |
| Tolerance of stroke | 0 to 250mm ^{+1.0} ₀ 251 to 1000mm ^{+1.4} ₀ 1001 to 1800mm ^{+1.8} ₀ | |
| Mounting style | SD·LA·LB·FA·FB·CA·CB·TA·TC | |
| Boots | Standard: Nylon tarpaulin | Semi-standard: Chloroprene, Conex |
| Accessories | Rod end attachments | Rod eye (T-end), Rod clevis (Y-end) with pin, Floating joint (F-end) (φ32 to φ100) |
| | Others | CB bracket, TA/TC bracket |

Standard Stroke Range

| Bore Type | Standard type | Switch Set |
|-----------|---------------|------------|
| φ32·φ40 | 1000 | 1000 |
| φ50·φ63 | 1200 | 1200 |
| φ80 | 1600 | 1600 |
| φ100 | 1600 | 1600 |
| φ125·φ160 | 1800 | — |

- The above strokes indicate the maximum available strokes for the standard type.
- For the rod buckling, check with the buckling chart in the selection materials. Contact us for longer strokes.

Cushion Stroke Length

| Bore | Cushion stroke (Cushion ring length) |
|-------------|-----------------------------------------|
| φ32 to φ63 | 16 |
| φ80 to φ125 | 20 |
| φ160 | 23 |

- The cushion stroke lengths in case of cylinders used up to the stroke end.
- In the case that a cylinder is not used up to the stroke end, and it is stopped 5 mm or more before the stroke end, the cushioning effect will be weakened. In such a case, consult us.

Product Lineup

| Series Variations | Type | φ32 | φ40 | φ50 | φ63 | φ80 | φ100 | φ125 | φ160 |
|----------------------|--------------------------|----------------------|-----|-----|-----|-----|------|------|------|
| General purpose type | Double acting single rod | Standard type 35H-3 | | | | | | | |
| | Switch Set 35H-3R | | | | | | | | |
| | Double acting double rod | Standard type 35H-3D | | | | | | | |
| | Switch Set 35H-3RD | | | | | | | | |

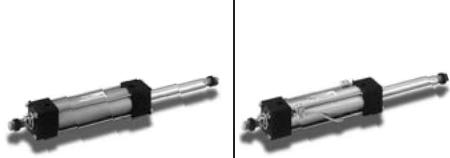

Notes)
 • When using a sensor, use a Switch Set Cylinder.
 • No sensor can be mounted onto the standard type cylinder.

Adaptability of Fluid to Seal Material

| Seal material | Adaptable fluid | | | | |
|------------------|-----------------------|--------------------|-----------------------|------------------------|------------------------|
| | Petroleum-based fluid | Water-glycol fluid | Phosphate ester fluid | W/O Water in oil fluid | O/W Oil in water fluid |
| ① Nitrile rubber | ○ | ○ | × | ○ | ○ |
| ③ Fluorocarbon | ○ | × | ○ | ○ | ○ |
| ⑥ HNBR | ○ | ◎ | × | ○ | ○ |
| ⑧ Slipper seal | ○ | ○ | × | ○ | ○ |

Notes) 1. ○: Applicable, ×: Inapplicable
 2. The ◎-marked items are recommended seal materials in case of giving the first priority to abrasion resistance.
 3. Slipper seal is the registered trade mark of Nippon Valqua Industries, Ltd.

● How to order

General Purpose Type

Mounting Style

SD SD style (basic style)

FA FA style (rod flange)

CB CB style (cap clevis)

LA LA style (side lugs)

FB FB style (cap flange)

TA TA style (rod trunnion)

LB LB style (end angles)

CA CA style (cap eye)

TC TC style (intermediate trunnion)

Sensor List

| Type | Sensor symbol | Load voltage range | Load current range | Maximum switching capacity | Protective circuit | Indicating lamp | Wiring method | Cord length | Applicable load | ■ Semi-standard |

| [CY] AZ21BCE-1 | | | | | | | | 4-pin connector type, Upper wiring | 5m | |
| | | | | | | | | | 0.5m | |

Notes) ●For the sensors without a protective circuit, be sure to provide a protective circuit (SK-100) with the load when using any induction load (relay, etc.).

●The output logic of AX135CE is a B contact. When the piston is detected, the sensor contact turns off (the lamp turns on).

●For handling of sensors, be sure to read the sensor specifications at the end of this catalog.

●We recommend AND Unit (AU series) for multiple sensors connected in series.

For details, refer to AND Unit at the end of this catalog.

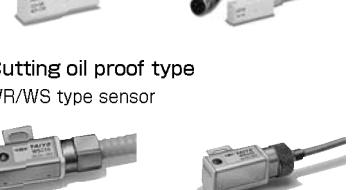

● Standard type

AX type sensor

Cord type

Connector type

SR type sensor

● Cutting oil proof type

WR/WS type sensor

●When ordering the cutting oil proof type sensors, WR and WS types, please be carefully the following notification.

- [5] WR505 The sensor and straight box.
 [2] WS215-1 The connector (F-SB) are combined (the flexible tube (F-0.5: 4.8 m) is required).
 [7] WR505F The flexible tube (F-0.5: 4.8 m) is attached to
 [4] WS215-1F the sensor and straight box connector (F-SB).

Standard Stroke Range

Unit: mm

| Bore Type | Standard type | Switch Set |
|-----------|---------------|------------|
| φ32·φ40 | 1000 | 1000 |
| φ50·φ63 | 1200 | 1200 |
| φ80 | 1600 | 1600 |
| φ100 | 1600 | 1600 |
| φ125·φ160 | 1800 | — |

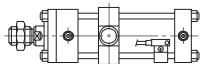

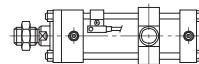

- The above strokes indicate the maximum available strokes for the standard type.
- For the rod buckling, check with the buckling chart in the selection materials. Contact us for longer strokes.

Sensor Mountable Minimum Stroke

Unit: mm

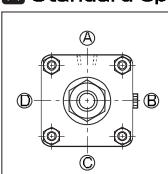

| Bore mm | Mounting style | | | | | | TC style | | | | | | |
|------------|-----------------|------------|------------|-----------------|------------|------------|------------------|------------|------------|-----------------|------------|------------|---------|
| | Sensor quantity | | | With one sensor | | | With two sensors | | | With one sensor | | | |
| | Sensor type | AX/AZ type | WR/WS type | SR type | AX/AZ type | WR/WS type | SR type | AX/AZ type | WR/WS type | SR type | AX/AZ type | WR/WS type | SR type |
| φ32 | 25 | 55(40) | 35 | 25 | 55(40) | 35 | 55 | 85(70) | 65 | 105 | 165(140) | 130 | |

- Notes) • For the TC style with one sensor, the cylinder strokes when the TC accessory is positioned at the place other than the center (as shown in the right figures) are shown in the table.
 • For the minimum dimension PH of TC style for mounting sensor, refer to the dimensional drawings of TC style.
 • The parenthesized values in the WR/WS type column are the minimum strokes in case of WR515 or WS225-1.

**Adaptability of Fluid to Seal Material**

| Seal material | Adaptable fluid | | | | |
|--------------------|-----------------------|--------------------|-----------------------|------------------------|------------------------|
| | Petroleum-based fluid | Water-glycol fluid | Phosphate ester fluid | W/O Water in oil fluid | O/W Oil in water fluid |
| [1] Nitrile rubber | ○ | ○ | × | ○ | ○ |
| [3] Fluorocarbon | ○ | × | ○ | ○ | ○ |
| [6] HNBR | ○ | ○ | × | ○ | ○ |
| [8] Slipper seal | ○ | ○ | × | ○ | ○ |

- Notes) 1. ○: Applicable ×: Inapplicable
 2. The ○-marked items are recommended seal materials in case of giving the first priority to abrasion resistance.
 3. Slipper seal is the registered trade mark of Nippon Valqua Industries, Ltd.

★ Standard specifications

- With both ends cushions
- Port position Ⓐ, cushion valve position Ⓑ

★ Change of port and cushion valve positions

The standard port position is Ⓐ, and the standard cushion valve position is Ⓑ. When modifying the positions, enter the symbol shown in the dimensional drawings.

Example) 35H-3R 1LB50B100-[B] [C] AH2

Port position(A, B, C, D) Cushion valve position(A, B, C, D, O)

- For the TA style, the standard port position and cushion valve position are Ⓐ and Ⓑ on the rod side and Ⓒ and Ⓓ on the cap side.
- In case that the cushion is not equipped, the cushion valve position is "O".

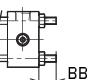

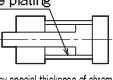

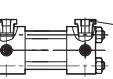

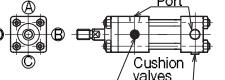

Lock Nut Part Number

| Bore (mm) | Part number |
|-----------|-------------|
| φ32 | LNA-12F-H |
| φ40 | |
| φ50 | LNA-18F-H |
| φ63 | |
| φ80 | LNA-24F-H |
| φ100 | LNA-30F-H |
| φ125 | LNA-42F-H |
| φ160 | LNA-48F-H |

★ The semi-standard ordering system

The following contents can be easily specified using the semi-standard symbols and specification symbols (position/dimension/material symbols).

How to order [Series] [Model number] — × [Semi-standard symbol] [Position/Dimension/Material symbols]

| Order contents | Semi-standard symbol | Position | | Dimension | | Material | | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------|----------------------------------------------|-------------|--|
| | | ②Symbol | Description | ③Symbol | Description | ④Symbol | Description | |
| ■ Tie rods extension | STD | TD-RS | Rod side | BB-  |  is a desired dimension BB of up to 70 mm. | — | — | |
| | | TD-HS | Cap side | | | | | |
| | | TD-BS | Both sides | | | | | |
| Notes 1) Tolerance of dimension BB is about 2 mm due to elongation by tightening. 2) For the LB or LC style, only upper two tie rods (on the side opposite to the accessory side) can be extended. For flange or clevis style, four tie rods on the side without the accessory can be extended. | | | | | | | | |
| ■ Hard chrome plated on the inside of cylinder tube (Standard style: iron tube only)  | STB | — | — | BG-0.02 | Plating thickness 0.02 mm | — | — | |
| | | Example To plate the tube inner surface 0.02 mm in thickness 35H-3 2LB80BB100-AB-X STB BG-0.02 | | | | | | |
| ■ Stainless steel (SUS) piston rod  | SPR | — | — | — | PR-10 | Material: SUS304 Plating thickness 0.02mm | | |
| | | Example To specify piston rod made of SUS304 with plating thickness of 0.02 mm 35H-3 2LB80BB100-ABAH2-X SPR PR-10 | | | | | | |
| ■ Additional port of bushing  | PBS | — | — | RC-1.00 | Rc1/8 | — | — | |
| | | Example To mount a bushing to 35H-3 CA style φ80 (standard port dia. Rc1/2) cylinder to reduce the port diameter to Rc3/8 35H-3 2CA80BB300-AB-X PBS RC-3.00 | | | | | | |
| ■ Change of port and cushion valve positions on the cap side  | PPC | PC-  |  indicates the port and cushion valve positions on the cap side | — | — | — | — | |
| | | Example To change the port and cushion valve positions from the cap side to the rod side (AB on rod side, BC on cap side) 35H-3 2LA80BB100-AB-X PPC PC-BC | | | | | | |
| ■ Water-glycol working fluid | FWF | — | — | — | — | WF-WG: Water-glycol fluid | | |
| | | Example 35H-3 6LB80BB100-AB-X FWF WF-WG | | | | | | |
| ■ Intermediate trunnion location change (dimension PH) | MTC | — | — | TCPH- |  is a new dimension. | — | — | |
| | | Example To change dimension PH to 360 mm 35H-3R 2TC63BB500-AB-X MTC TCPH-360 | | | | | | |

Weight Table

| Bore mm | Basic weight (SD style) | | Additional weight per mm of stroke | | Mounting accessory weight | | | | | | Bracket weight | | Rod end attachment weight | | | | |
|---------|--------------------------|-----------------|------------------------------------|-----------------|---------------------------|------|------|------|------|------|----------------|-------|---------------------------|---------------|-----------------|------------------------|------|
| | Standard type single rod | Double rod type | Standard type single rod | Double rod type | LA | LB | FA | FB | CA | CB | TA | TC | CB bracket | TA/TC bracket | Rod eye (T-end) | Floating joint (F-end) | |
| | φ32 | 1.17 | 1.53 | 0.0041 | 0.0055 | 0.12 | 0.19 | 0.17 | 0.24 | 0.12 | 0.12 | 0.051 | 0.30 | 0.46 | 0.45 | 0.15 | 0.20 |
| φ40 | 1.77 | 2.21 | 0.0045 | 0.0059 | 0.19 | 0.23 | 0.25 | 0.32 | 0.18 | 0.15 | 0.193 | 0.48 | 0.66 | 1.06 | 0.16 | 0.34 | 0.19 |
| φ50 | 2.56 | 3.27 | 0.0078 | 0.0102 | 0.28 | 0.36 | 0.41 | 0.50 | 0.26 | 0.30 | 0.193 | 0.56 | 0.66 | 1.06 | 0.22 | 0.35 | 0.41 |
| φ63 | 3.98 | 5.00 | 0.0094 | 0.0118 | 0.29 | 0.46 | 0.56 | 0.64 | 0.40 | 0.38 | 0.193 | 0.70 | 0.66 | 1.06 | 0.22 | 0.35 | 0.41 |
| φ80 | 7.55 | 9.31 | 0.0122 | 0.017 | 0.66 | 0.86 | 1.40 | 1.56 | 1.02 | 0.82 | 0.193 | 1.15 | 1.97 | 1.50 | 0.76 | 1.01 | 1.41 |
| φ100 | 11.44 | 14.27 | 0.020 | 0.028 | 0.96 | 1.60 | 1.96 | 2.25 | 1.28 | 1.38 | 0.405 | 3.10 | 3.60 | 4.60 | 1.30 | 1.76 | 2.68 |
| φ125 | 18.58 | 24.11 | 0.033 | 0.044 | 1.42 | 2.24 | 3.76 | 4.24 | 4.24 | 4.42 | 0.576 | 4.80 | 8.02 | 6.72 | 3.19 | 4.36 | — |
| φ160 | 35.03 | 45.41 | 0.049 | 0.066 | 2.60 | 5.68 | 7.76 | 8.78 | 8.05 | 8.91 | 1.125 | 6.10 | 8.84 | 13.60 | 4.29 | 5.82 | — |

Note) Weight of one set of two TA/TC brackets

Sensor Additional Weight

| Sensor Bore mm | AX/AZ type | | SR type | | WR/WS type |
|----------------|-------------------|-----------------|----------------|-----------------|------------|
| | Cord length 1.5 m | Cord length 5 m | With connector | Cord length 5 m | |
| φ32 | | | | | |
| φ40 | | | | | |
| φ50 | 0.05 | 0.13 | 0.04 | 0.22 | 0.5 |
| φ63 | | | | | |
| φ80 | | | | | |
| φ100 | 0.07 | 0.14 | 0.06 | | |

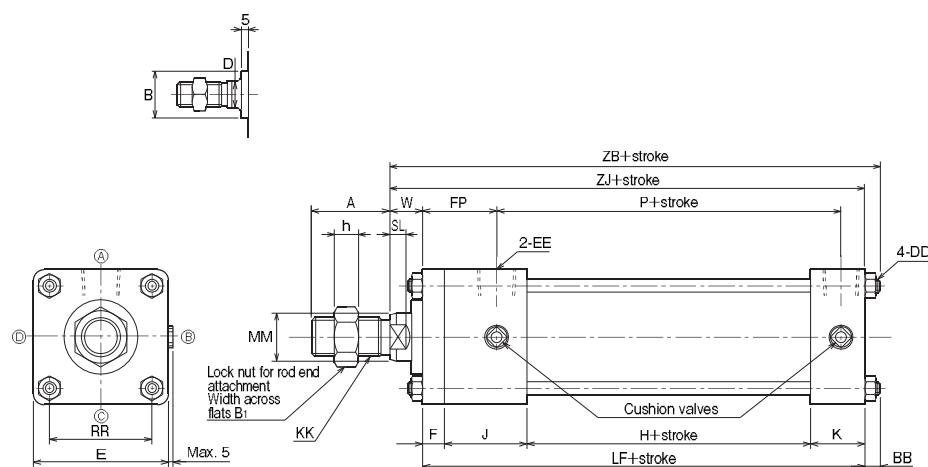

Calculation formula: Cylinder weight (kg)=basic weight+(cylinder stroke (mm)× additional weight per mm of stroke)+(sensor additional weight×sensor quantity)+mounting accessory weight+ bracket weight+rod end attachment weight

Calculation example: 35H-3R, bore φ80, cylinder stroke 200 mm, 2 pcs of AX215 (cord length 5 m), LA style

$$7.55+(200 \times 0.0122)+(0.13 \times 2)+0.66=10.88\text{kg}$$

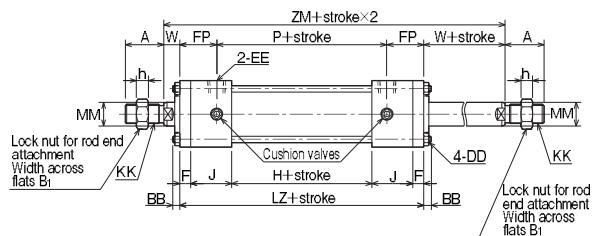

SD

35H-3 [] SD [] Bore [] Stroke

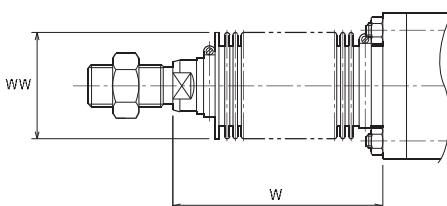

- When mounting a sensor, refer to the dimensional drawings of Switch Set.
- When using SD style, refer to the precautions for use.

Double acting double rod

35H-3/TH35 [Bore] []

| | | |
|-----------------|-------------------------|-------------------|
| Nylon tarpaulin | $\phi 32$ to $\phi 63$ | $1/2$ stroke +X |
| Chloroprene | $\phi 80$ to $\phi 160$ | $1/4$ stroke +X |
| Conex | $\phi 32$ to $\phi 63$ | $1/2.5$ stroke +X |
| | $\phi 80$ to $\phi 160$ | $1/3$ stroke +X |

If the calculated value has a fractional part, round it up.

| | Standard | Semi-standard |
|------------|-----------------|---------------|
| Material | Nylon tarpaulin | Chloroprene |
| Heat proof | 80°C | 130°C |

- Notes)
- Remember that the heat proof field in the table above shows the allowable temperatures for the boots, not for the cylinder.
 - The boots have been mounted at our factory prior to delivery.
 - Conex is the registered trademark of Teijin Limited.

35H-3/TH35 [Bore]

TC Bracket

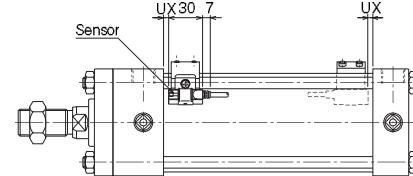

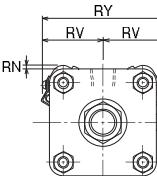

Unit: mm

Unit: mm

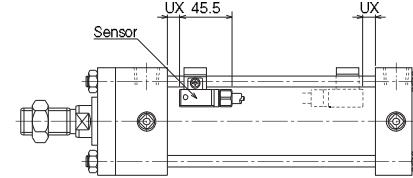

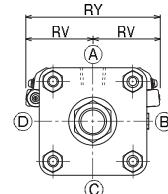

Switch Set

35H-3R [1] Mounting style [Bore] B [Stroke] – [Sensor symbol] [Sensor quantity]

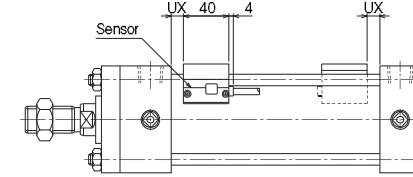

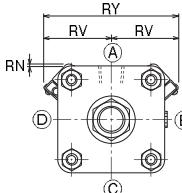

- AX1** (Reed sensor) • AX2**, AZ2** (Solid state sensor)

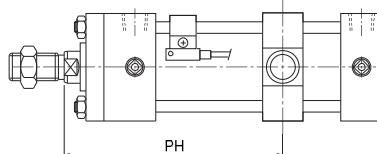

- WR type (Reed sensor), WS type (Solid state sensor/2-wire, 2-LED type) (Cutting oil proof type)

- SR type (Reed sensor)

- Minimum dimension PH of Switch Set Cylinder

● The minimum dimension PH of a Switch Set Cylinder is obtained when the sensor is mounted on the rod side and the trunnion is moved as close to the rod as possible as shown above.

When boots are provided, dimension W changes. In such a case, specify dimension PH.

Rod End Attachment

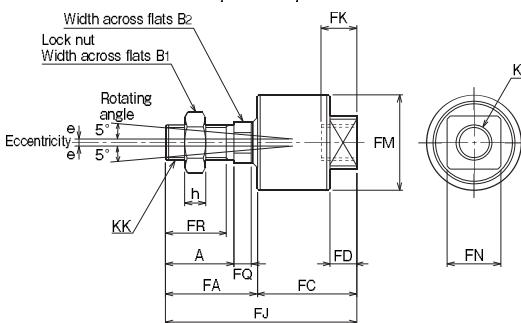

● Rod eye (T-end)

● Rod clevis (Y-end) with pin

● $\phi 32$ to $\phi 100$ 

● Floating joint (F-end)

● $\phi 32$ to $\phi 100$ 

Notes) ● The insertion of the floating joint into the socket shall not equal or exceed the dimension of screw diameter. (Return the joint one or two turns after it gets into contact with the socket bottom, and fix it with a lock nut.) Excessive insertion can cause operation failure.
 ● DO NOT use together with CA, CS, CB, TA, and TC accessories.
 ● The lock nut is indispensable in using the floating joint. Please don't miss to order the lock nut with the floating joint.

Change of Rod End Shape

■ You can specify the shape and dimension of the rod end as shown below using the semi-standard symbols and dimension symbols.
(No need to specify the dimension symbol if you order a cylinder with the basic dimension. Specify only the semi-standard symbol.)

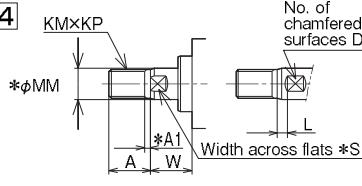

How to order [Series] [Model number] — × [Semi-standard symbol] [Dimension symbol (Specify only when the dimension differs from the basic dimension.)]
KM and KP need to be specified as a pair.

Example 1) A53

- Bore: 40 mm, rod end shape: A53, A=50, W=60, screw: M10×1.25, 2 surfaces chamfered, position of width across flats L=15
(Port and cushion positions: Standard AB)
35H-3R 1FA40B200-X A53 A-50, KM-10, KP-1.25, L-15, W-60

Example 2) A54

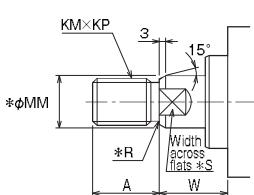

- Bore: 63 mm, rod end shape: A54, with basic dimensions
35H-3 2LB63B500-BD-X A54

Note) In case of A54, if KM and KP are changed, dimension A1 is changed as shown below.

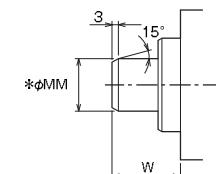

| KP (pitch) | Dimension A1 |
|--------------|--------------|
| 1.25 or less | 3 |
| 1.5 | 4 |
| 2 | 5 |
| 2.5 or more | KP (pitch)×2 |

When changing dimension A1, change it to 10 or more.

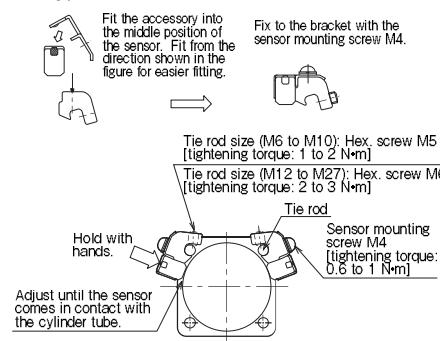

- The *-marked dimensions are fixed.

- The number of chamfered surfaces DN is 2 (standard) or 4.

- If it is necessary to change the fixed dimensions, consult us.

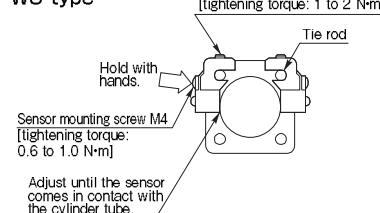

Setting method of sensor detecting position

AX type

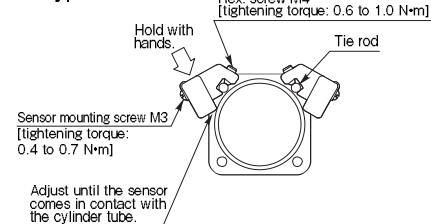

1. Loosen the two hex. screws with a hex. wrench, and move them along the tie rod.
2. Adjust the detecting position (for the 2-LED type, the position where the green lamp lights up) 2 to 5 mm (about half of the operating range is appropriate) before the required position where the sensor indicator lamp starts to light up (ON). Then, gently hold the top of the sensor so that the cylinder tube contacts the detecting face of the sensor, and clamp the hex. screw to an appropriate tightening torque.
Note) Inappropriate tightening torque may cause the off-center of the sensor position.
3. The indicating lamp lights up when the sensor is set to the ON position.
4. Sensors can be mounted to any of four tie rods and on the most suitable position depending on the mounting space of the cylinder and wiring method.
5. Mount a sensor to the most suitable position to detect the stroke end with the "sensor mounting dimension" (dimension UX).

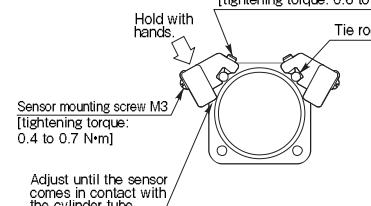

WR type

WS type

SR type

Notes on assembly

Tightening of tie rods

- DO NOT tighten only one tie rod at a time, but tighten them gradually in the order shown in the right diagram. Uneven tightening of the tie rods can cause operation failure or stick-slip.

Specified Tie Rod Tightening Torque Table

| Bore mm | φ32 | φ40 | φ50 | φ63 | φ80 | φ100 | φ125 | φ160 |
|-------------------------|------|------|------|---------|----------|---------|---------|---------|
| Tie rod thread | M6x1 | M6x1 | M6x1 | M8x1.25 | M10x1.25 | M12x1.5 | M16x1.5 | M20x1.5 |
| Tightening torque (N·m) | 4.1 | 4.1 | 4.1 | 10 | 21 | 35 | 87 | 180 |
