About Philips Digital Door Lock

Philips Digital Door Lock is a new product category of Royal Philips. Driven by the perception of “Human centric innovation”, Philips digital door locks aim to evolve the use of traditional door locks through advanced technologies and offer the end users a hassle-free, convenient and reassuring home entry experience that meets their needs in all aspects.

Since the brand release, Philips Digital Door Lock has always been digging deep into its users’ diverse demands and adhering to the ambition of simplifying people’s way of living with constant and significant innovation. The product portfolio now covers 5 series (9000 series push-pull lock, 7000 series lever lock, Alpha series compact push-pull lock, 6000 series engineering lock, and 5000 series rim lock) and includes 7 models, which form a complete and mature system applicable to extensive scenarios.

As a member of the world-renowned Philips family, Philips Digital Door Lock endeavors to provide customers and consumers with industry-leading international standard services at all stages. Based on the idea of solving problems at the first time, the nationwide after-sales servicing network comprises not only 24-hour free service hotline, but also the capability of executing immediate door-to-door repair.

Now, throw away your keys and get ready to embrace a new level of convenience and peace of mind with Philips EasyKey!
