

# PLATFORM 1 SOFTWARE

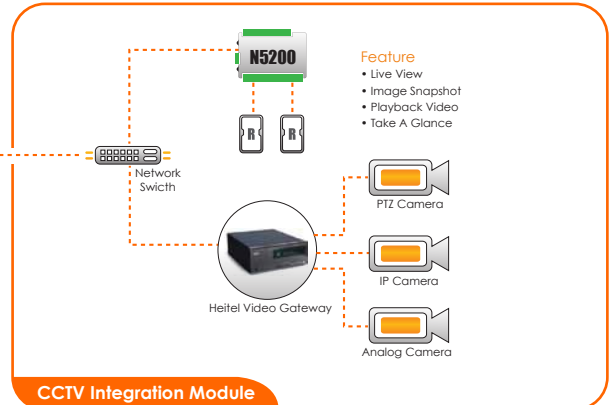

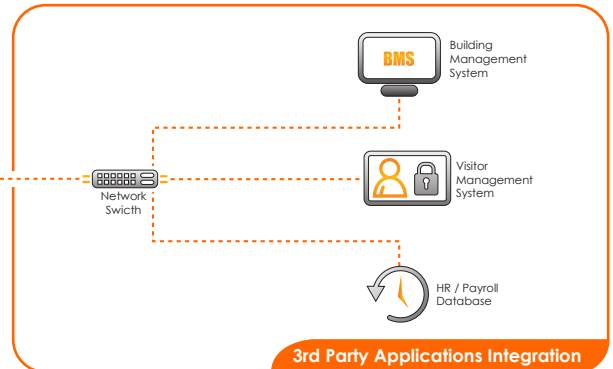

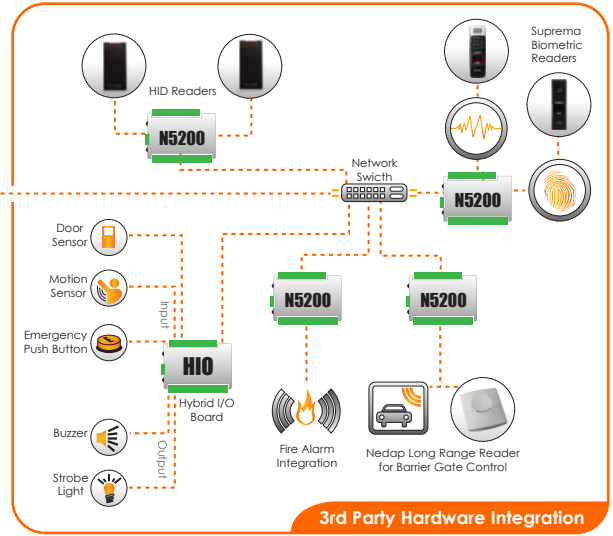

The EntryPass Platform1 is an Access Control System developed to enhance scalability while providing the freedom to limit or extend its scalability reach. Designed as a client server-based Windows application, the Platform 1 is powerful and provides many integrated features, making it easily adaptable to today's most demanding physical access control structures.

The system uses client server architecture based on industry standard operating system, networks and protocols to form a total integrated system that is capable to support a small implementation of a few doors to large scale, multi-locations that is made up of thousands of doors in an orderly distributed manner. Ultimately, you have the power to control and re-set these configurations as your company evolve.
