

NEW RANGE OF AUDIOMETER PRODUCTS "screening", basic diagnosis, clinical diagnosis

SIBELSOUND 400

Main features*:

- Advanced digital technology based on DSP
- Calculation of hearing loss and diagnosis
- Internal database > 1000 tests
- Suprathreshold tests
- High frequency
- Musical frequencies
- Automatic masking
- Connectivity with other management systems
 (EMR Electronic Medical Record)
- Customizable
 - *see configurations

Creating the future

NEW RANGE OF AUDIOMETER PRODUCTS

CONFIGURATION ACCORDING TO MODEL	A	A M	A O	A O M	A O M +	l F
wo channels		•		-	•	-
rure tone threshold audiometry by air conduction				•		-
rure tone threshold audiometry by bone conduction				-	-	
rure tone threshold audiometry by free field						
rure tone suprathreshold audiometry (SISIGRAM)					•	-
ure tone suprathreshold audiometry (Fowler-ABLB, Tone Decay, Weber, Lüscher, etc.)						
speech audiometry					•	
ligh frequency audiometry			-			
Masking with narrow band noise				-	•	
fasking with white noise				-		
flasking with speech noise						
synchronized masking						
ntermediate frequencies: 125, 750, 1500 Hz					•	
fusical frequencies						
selection of exploration frequencies	-	•		-	•	
Continuous and pulse tone				•		
ulse/alternating tone and modulating/alternating tone						
Reference tone (1 dB)	-	-	-			
requency modulation and amplitude modulation						
Calculation of hearing loss						
Diagnosis (COUNCIL, IMSS MEXICO, ELI, SAL, KLOCKHOFF, MOH, others)				•		
nternal database for more than 1000 tests				•		
ntercom / Monitor		٠	٠	٠		
ISB and parallel connections to external printer						
ISB computer connection						
S232 computer connection						
audiometry software (Demo)						
audiometry software (Licence)						
ound suppressors for air conduction						
ixternal printer						
Iser manual and quick user guide						
carrying bag						
audiometer type according to IEC60645	1	1	4	3	2	

THE EXPERIENCE SUPPORT US

Description

The SIBELSOUND 400, is a revolutionary two-channel audiometer. The entire system is controlled by Digital Signal Processor (DSP) for reliable, quick and easy audiometric exploration of hearing thresholds and screening tests, such as suprathreshold pure tone tests.

The SIBELSOUND 400 audiometer was developed by SIBEL, S.A.'s RDI department in collaboration with the Surgery Department (Ear, Nose and Throat and Audiology) of the University of Barcelona and well-known specialists in the field, in accordance with standard criteria of both national institutions such as the UNE and international institutions such as the IEC, ISO, etc.

DSP digital technology

A Digital Signal Processor that uses an optimised microprocessor for applications that require very high-speed numerical operations. The processor is capable of working with multiple data in parallel, while its design and specific instructions are ideal for digital processing, features that distinguish a DSP from other types of processors.

Communications

One of the great qualities of the SIBELSOUND 400, is a communications system with other equipment that allows it to:

- · Print directly to a USB printer
- Transfer information from the unit's internal database to a PC
- Communicate with a PC in real time
- Export patient tests to other management systems (EMR)
- · Update the unit's internal firmware

Using the appropriate software, communications can be established through two different channels:

- USB (standard)
- RS232C Serial (optional)

Signals

The SIBELSOUND 400 features:

- Pure tones (continuous, pulse, alternate)
- · Frequency modulation
- Amplitude modulation
- · Speech Noise
- Narrow Band Noise
- White Noise

Customizable

INNOVATION AND TECHNOLOGY

Reset

To return to the previous menu, cancel an action, delete data entries or place the counters at zero.

Save

Saves a test to the database.

Intercom

Activates the technician/patient intercom.

Right ear attenuator

Activates or deactivates a signal, depending on the "direct/inverted" working mode.

SISIGRAM

Generates the manual increases in the SISIGRAM test.

Left ear attenuator

Activates or deactivates a signal, depending on whether the working mode is direct or inverted.

AOM+

SIBELSOUND 400

Sibelmed*

Right channel signal

Silencer or key which, when activated, sends or blocks the signal transmitted to the patient, depending on whether the working mode is direct or inverted.

Hz.

Decreases and/or increases the frequency of the pure tone signal applied to the patient.

Invert

This inverts the direct/inverted working mode of the signal keys.

Intro

Used to save a test's thresholds and to give selected information.

Left channel signal

Silencer or key which, when activated, sends or blocks the signal transmitted to the patient, depending on whether the working mode is direct or inverted.

Patient

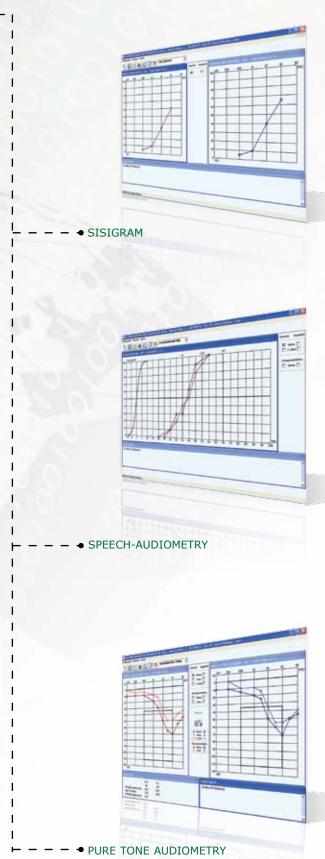

Used to enter patient reference information in a test to be printed, store in the unit's internal database or transfer to a PC's database.

ADDED VALUE

Audiometry software W50

SIBELMED W50 is sophisticate software for viewing, storage, transmission, analysis and introduction of audiometric tests in a Microsoft Windows $^{\circledR}$ environment with the following options:

- Management of various patient databases
- Download of audiometric test data from SIBELSOUND 400 and AC50 audiometers
- Manual audiometric test data input performed with other audiometers
- Display of different types of audiometric tests
- Diagnosis: (COUNCIL, IMSS MEXICO, ELI, SAL, KLOCKHOFF, MOH, others...)
- Choice of various types of diagnosis parameters
- Test graphics
- Comparison of tests from the same patient
- Customizable reports
- Test report printouts
- Option for deleting tests from the unit

Channels: Two

Functional specifications: See tables of models and frequencies Transducers: TDH39 - HDA200 - B71 (depending on the model)

Screen: LCD alphanumeric backlighted 2 X 16

Protection: Time restricted high frequency signals to protect both patient and unit

Self-check: Automatically checks the status of the audiometer

Unit test: Allows the user or technician to check the condition of certain functions or components Custom settings: Programme to personalise the audiometer according to the needs of the user

Calibrations: Equipped with calibrations according to ISO and ANSI

Safety standards: EN 60601-1:2006+AC:2010, EN 60601-1-2:2007+AC:2010 Audiometry standards: EN 60645-1:2001, EN60645-2:1997, EN 60645-4:1995

Calibration standards: EN ISO 389-1:2000, EN ISO 389-3:1998, EN ISO 389-4:1998, EN ISO 389-5:2006, EN ISO 389-7:2005, ANSI S3.6-2004

Working temperature: 10 to 40 °C

Relative humidity: <90% (no condensation) Power supply: 100 to 240V \pm 10% / 50/60 Hz \pm 3%

Power: <50 VA

Dimensions: 390 mm x 260 mm x 105 mm Weight: 2.4 kg without accessories

Standard accessories: Depending on the model Optional accessories: Depending on the model
