

GEAR PUMPS GB-GC Series for water, oil and various kinds of liquids

Outstanding Features

- A highly stable and durable pump with a large delivery volume, widely usable for agricultural and industrial applications.
- Agricultural applications: irrigation, water-sprinkling of hotbeds, spraying of liquid manure and fertilizers, water-sprinkling for rice nurseries and water drainage.
- Other applications: pumping of frying oil, millet jelly, coal tar, pitch and other non-oxidizing liquids.
- Our GB-type is recommended for sea-water, brine and oxidizing liquids.

DASH PUMPS GB-T Series For Tractor Washing

Outstanding Features

- As it is easily operated on site, it eliminates any chance of dropping soil on public roads.
- Due to the high water pressure, it requires no other washing tools, such as brushes and etc.
- It is economical in use, as it couples directly to the tractors PTO-shaft.
- An easy one-touch coupling system is employed.
- It can also be used for sprinkling and water supply.
