## JOTAFLOOR- THE WORLD AT YOUR FEET

JOTUN has been successfully protecting concrete floors around the world for many years. Several years ago it was decided to combine the vast experience gained with the latest technology and launch JOTAFLOOR, a range of industrial floor coatings to suit most concrete floors in aggressive environments.

Concrete floors require protection from attack by chemicals, contamination from spillage, impact, abrasion and a host of other potentially damaging criteria. The JOTAFLOOR range consists of products and systems to protect and extend the life of the floors whilst having the added benefit of an excellent colour range to offer more aesthetically pleasing effects. Each system in the range has undergone a comprehensive regime of testing at an internationally recognised independent testing laboratory to ensure the required amount of protection is provided.

Concrete floor coating applications need to be completed by experts due to the sensitive nature of the substrate. JOTUN only uses approved Licensed Applicators for the application of products in the range. These specialists have years of experience and have also attended practical training sessions organized by JOTUN technical staff. They use the correct tools to ensure good surface preparation of the concrete is completed and the application of the JOTAFLOOR system is as per manufacturers instructions.

JOTUN also recognizes the responsibility borne by the manufacturer by inspecting major floor projects during each stage of application. So have confidence and choose JOTUN and the JOTAFLOOR range for the protection of your industrial/commercial concrete floor.

## TYPICAL SYSTEMS

**Jotafloor Rapid Dry:** A single component, fast drying, glossy/alkyd offering durability not normally associated with alkyd floor products. Ideal for foot traffic and light duty floors.

**Jotafloor Topcoat:** Two component general purpose epoxy floor coating for use light to medium duty floor areas. Can be supplied in a wide range of colours using the Jotun Multicolour System. Good general chemical resistance.

**Jotafloor PU Topcoat:** A high solids flexible polyurethane offering good chemical, abrasion and UV resistance and colour stability. For use in light to medium duty floor areas or as part of the Jotafloor Traffic Deck System. Can be supplied in a wide range of colours using the the Jotun Multicolour System.

**Jotafloor Coating:** A two component 100% solids, solvent free, self smoothing epoxy coating offering a durable, high gloss, aesthetically pleasing floor coating with excellent chemical resistance. Available in a range of attractive colours. Ideal for use in hospitals, kitchens, warehouses etc.

**Jotafloor SL Universal:** A three component 100% solids, solvent free, self smoothing epoxy coating capable of being applied at varying thickness' to suit the final use of the floor. Offers excellent chemical and impact resistance and a high gloss seamless finish ideal for use in aircraft hangars, dairies, food/beverage processing plants, high tech' warehouses, etc. Available in a wide range of attractive colours.

Note: The floors mentioned above include use of special Jotafloor primers/sealers. The choice is de limited to: • Jotafloor Sealer • Jotafloor Solvent Free Primer • Jotafloor Screed Primer • Jotafloor

**Jotafloor Glass Flake:** A two component, high solids, glass flake reinforced epoxy offering superb impact and abrasion resistance. Ideal for concrete floors requiring protection from heavy duty equipment, pallet trucks and regular impact such as workshops, garages and warehouses.

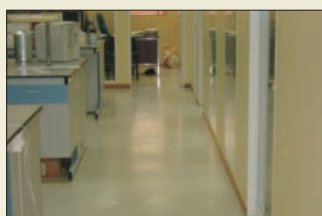

**Jotafloor Screed:** A three component 100% solids, solvent free, trowel applied epoxy screed. Offers very high strength protection against impact and abrasion to concrete floors in the harshest environments such as unloading bays and heavy duty workshops and factories.

**Jotafloor Traffic Deck System:** A high performance versatile coating system designed specifically to protect concrete floors exposed to vehicular traffic. Combining the latest glass flake reinforced epoxy and polyurethane technology, the system can be tailor-made to suit floors in car parks, walkways, ramps and external traffic decks. Available in a wide range of attractive colours.

**Jotafloor WB Topcoat:** A two component water based epoxy floor coating for use in light to medium duty floor areas. Particularly useful on floors in high humidity locations or in hygiene sensitive areas such as kitchens and hospitals.

# Independent Laboratory Product Testing

JOTAFLOOR systems have undergone comprehensive testing by independent testing laboratories to ensure they are “fit for use”.

Details of tests performed are available on each Product Information Sheet and Individual test certificates are available for viewing from your local Jotun office.
