# What's OKITE®

OKITE® is a surface that, quite simply, is the stuff of dreams. It lights up your kitchen and any other areas of a home. It's a unique compound of polymer resin and up to **93% quartz**, one of the toughest and most naturally attractive of all minerals.

It is highly heat, stain and scratch resistant, is extremely durable – **five times stronger** and more durable than granite and non-porous.

It never needs sealing and it is remarkably easy to clean and maintain.

The composite material is made almost entirely of quartz, which is the fourth hardest natural stone and so it retains the same characteristic: strength, hardness, non-porosity and longevity.

Its physical-mechanical properties together with the variety of colours render it the ideal product for worktops in homes, offices, shopping centres, hotels, restaurants and shops.

Moreover, the intuition that such product would have had more and more applications, from the baths to the shower panels, from the washbasins to the accessories for the bathrooms, from architectural ornaments to all the combinations of design, rendered **OKITE®** the brand name to distinguish the product made in **Seiffe**, the leader of this field.

# FACTORY NAPOLI, ITALY

## The Histories of Seieffe Industries?

**SEIEFFE** Industries is a family established renowned multinational Italian Manufacturing Company situated in the heart of Italy that in less than 10 years has developed a reputation within the quartz based stone surfacing materials. Located approx. 50km. from Naples, in the south of Italy, **SEIEFFE** Industries have a total factory area of about 55 acres in which the **OKITE®** plant alone is 360,000 sq.ft.

In 1995, although the **Izzo Group** has been present for more than 35 years in the fields that go from the bituminous conglomerates to the building industry, from the real estate to the financial services , the senior Antonio decided to invest in a new field that would bring the internationalization of the Group.

**QUALITY,  
ELEGANCE &  
RESISTANCE**

# OKITE® Is

**OKITE®** is a specially engineered surfacing material, created from the perfect combination of three elements:

- o Quartz
- o Polyester resin
- o Natural pigments

**OKITE®** is an iconic product that offers such a high degree of quality that only true experts can create; **OKITE®** is composed by up to **93%** of quartz, one of the strongest and most appealing elements, and it is able to give life to a truly multi-functional surface with a lasting finish that needs no further sealing.
