The **Intelligent Security System**  
That Leads You to a **Better Life!**

# DCOD 9300 SERIES

The Intelligent Security System That Leads You to a Better Life!

DCod 9300 is the intelligent system to take away your security worries. It gives you a safe, secure and comfortable home. Is a Better Way to secure your home, it leads you to a Better Life!

## Round The Clock

When you're away from work, appointments, holiday and etc. You don't want to carry your home security worries, you need reassurance that your lovely home will be secured round the clock. Dcod 9300 will give a voice feedback updates whenever the system is being triggered or call-in to listen the voice report via mobile phones.

## Flexibility

While you're out for appointments and you forgot to arm your premise. Don't you think its headache if you need rush back to turn it on? Dcod 9300 gives you the flexibility to arm your system remotely from your mobile or your key phone in office. When you're away for long vacations, the system will do routine switching sequence to stimulate the occupancy ad it acts like someone at home.

## Expandability

The expandability of the system enables user to upgrade the system from 9 zones to 16 zones by using zone expander module.

## Stylish

Dcod 9300 flip keypad presents itself in an outstanding and modern design.

## Connectivity

Dcod 9300 offers the upgrades to connect your PC with the Dcod system and it enable users to view, monitor and control from your PC. It comprises:

**Operation in Windows 98/XP/2000**

## GSM

If you've spent thousands of dollars on the security system and it's obviously you want reassurance that the system will be updated to you anytime.

GSM is the additional upgrades module that acts as the backup line if the conventional telephone line fails. Thus, you be assured that system will be reporting to you via the calls or SMS reporting.

GSM is a dualband module and can be utilized by connect a single SIM card (e.g Maxis, Digi, Celcom).

It provides:

- Voice feedback to your personal mobile
- Contact ID to CMS centre
- SMS reporting

## Home Automation Module

Have you thought of switching on Air-Cond before you arrive home? Do you have any idea of switching on your lights at home when you're abroad?

You have options to choose a more comfort world by integrating the home automation module that automated your home appliances (e.g Air-cond, lights, etc). Now, you can configure on the system to turn on the appliances on the specific time or remotely control via mobiles while you're away from home.
