

HIGH SPEED HDMI CABLE

10M 28AWG

APPLICATION

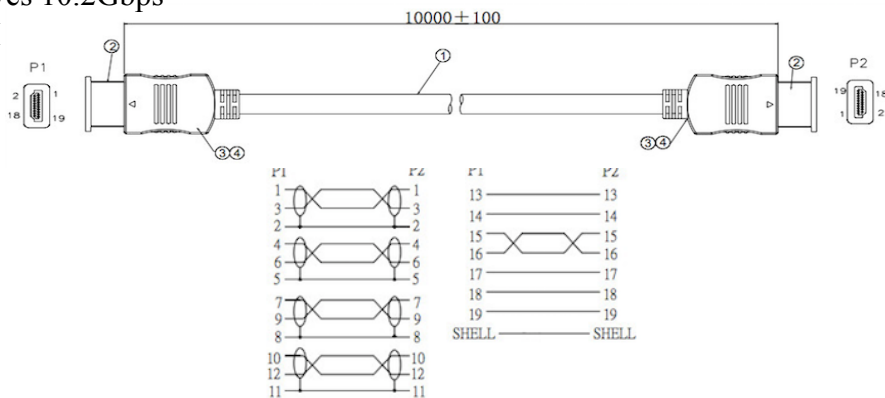

❖ High-definition multimedia interface (HDMI) cables are assemblies of audio and video cables that are used to transmit digital audio/video signals. They are used to connect digital devices such as set-top boxes, personal computers, and camcorders to compatible computer monitors, video projectors, and digital televisions.

PRODUCT FACTS

- ❖ High Pure oxygen-free copper conductors deliver the clearest audio/video signal
- ❖ HDMI V1.3 24K GOLD Coupling guaranteed that connects the part best signal transmission
- ❖ High-density triple metal shielding rejects outside interference
- ❖ Supports 1080P+ comprehensively the high clear resolution
- ❖ Highest transmission speed achieves 10.2Gbps
- ❖ Available in 5M, 10M, 15M, 20M

PRODUCT CODE

- ❖ HDMI-5M
- ❖ HDMI-10M
- ❖ HDMI-15M
- ❖ HDMI-20M

TECHNICAL DATA

Inner Conductor	Copper ; dia.(approx) 0.32mm	
Inner Jacket	PE	
Outer Jacket	PVC 55P; Black	
Speed Transmission	Ultra-high speed full HD1080P+ >10.2GBps	
Colour Gradation	12-Bit	
High Refresh Rate	120 Hz	
Insess Surround	5.1/7.1 Audio	
Maximun Operating Voltage	300V DC/5s	
Insulation Resistance	5M ohm	
Contact Resistance	5 ohm	
Connector type	HDMI 19P Male	
Environment	Temperature	-10°C to +80°C
	Humidity	0 to 95%
