

APPLICATION REPORT

Application Reports are an excellent way to share knowledge throughout the Blagdon sales network. Reports will be available to all unless stated. If any part of this report should remain confidential and not published, please highlight or inform Joanne Shutt

PUMP MODEL
B5004SABBTTS

INDUSTRY
Chemical Processing

DESCRIPTION OF PROCESS/APPLICATION

Pump is mounted to a mobile unit that is moved around a chemical plant and is used to clean barrels and pipework. The mobile unit includes a Blagdon Pulsation Dampener and filter system. The system was built with the help of a local distributor.

A competitor's pump was used on this rig previously but resulted in "failure to start" on a number of occasions, (the pump see's intermittent, but daily use) and required much maintenance and the encouragement of a hammer striking the valve block to get it to start....!!!!

The pump has been on the rig for over 1 year and has only seen maintenance in the form of a weekly clean out as per the company policy. No replacement parts have been required to date resulting in a low cost ownership alternative to the previous rig.

The customer is a large "Global Chemical Processor" based in China.

PUMP STATISTICS

DUTY	Chemical Cleaning	FLOWRATE - Varies
HEAD	1m	AIR PRESSURE - 4 Bar
