

APPLICATION REPORT

Application Reports are an excellent way to share knowledge throughout the Blagdon sales network. Reports will be available to all unless stated. If any part of this report should remain confidential and not published, please highlight or inform Joanne Shutt.

PUMP MODEL

B5002SAW3TTS
.....

INDUSTRY

Paint
.....

DESCRIPTION OF PROCESS/APPLICATION

The Blagdon 2" Full Flow High Pressure Pump used to move viscous solvent 85m across paint plant to various outlet points.

This was the original trial / beta test pump sent Free of Charge to one of our Premier UK End-Users for testing. The customer is very happy with the product and they have been using it for 9 years at the time of writing.

A number of different types of pumps were used in the same pumping operation, (i.e. progressive cavity etc...) without the same kind of success.

A further three units were purchased by this company on the strength of the success of this beta test unit.

PUMP STATISTICS

DUTY	Pumping Solvent for use in Manufacture of Industrial Grade Paint	FLOWRATE	N/A
HEAD	12 bar	AIR PRESSURE	8 bar

ANY OTHER INFORMATION

Pump has been in service since 1997 with only diaphragm and ball changes. No other maintenance has been required.
