PUMP MODEL

B5002-AA-B3-ETA
.....

INDUSTRY

SLUDGE / WASTE WATER – FILTER PRESS
.....

DESCRIPTION OF PROCESS/APPLICATION

The customer was using a Mono pump to transfer sludge / waste water from a concrete tank into a Filter Press machine. They were facing very high cost in maintaining the Mono pump as the stator and rotor were worn off due to the particles.

Having successfully convinced the customer to use the Full Flow 2:1 ratio **BLAGDON** High Pressure pump; the Customer is very satisfied after using the pump for the past 2 years without any break down, the “cake” collected from the Filter Press is dryer than previous.

PUMP STATISTICS

DUTY

To pump sludge into filter press machine & press it N/A

FLOWRATE

HEAD

14 bar

AIR PRESSURE

7 bar
