

# Metal Fingerprint Standalone Access Control

## S Press

### Metal Fingerprint Standalone Access Control

#### Main Features

- > Metal shell, simple & fashion design, using biometric fingerprint recognition to open the door.
- > Adopt the dark background fingerprint imaging technique, with stronger adaptability.
- > Fingerprints capacity:1,000 suitable for office, villa, homes.
- > Multi-usage, all kinds of functions integrated to one, operation is very simple.
- > Touch the luminous button unlock the function of fingerprint, manually or automatically enter a dormant state.
- > Infrared remote control and manager fingerprint to add or delete users.
- > Wiring is very simple, can be done by user without professional knowledge, compatible to all kinds of electric lock.
- > Effective fingerprint can output Wiegand 26 virtual card number according to machine number and ID number, it can be used with all kinds of controller.
- > Can set the specifications of different locks by software, no need to change the wiring.
- > Support tamper alarm function.

#### Specifications

Input Voltage	DC12~24V
Idle Current	≤20mA
Active Current	≤80mA
Lock Output load	≤3A
Resolution	450 DPI
Identification time	<1S
FAR	<0.0000256%
FRR	<0.0198%
Output format	Wiegand 26
Dimensions	L130mm × W70mm × H25mm
Operating Temperature	-20~50° C
Operating Humidity	20%~95% (non-condensing)
