

4CH VIDEO COAXIAL MULTIPLEXER

APPLICATION

❖ It support 2 channel video signals in one coaxial cable by way Frequency Division Multiplexing, with all data transmission real-time and all images high-definition and non-delay, It is suitable for improvement of old projects and building under new projects.

PRODUCT FACTS

- ❖ It's designed according to projects with minimum installation volume requirement.
- ❖ 2-CH video in one coaxial cable transmission.
- ❖ FDM technology is easy for multi-channel signal transmission only in one coaxial cable without any delay and interference.
- ❖ Perfect support coaxial video line, 75-3, 75-5, RG59 wire, etc.

PRODUCT CODE

- ❖ VT-1IN2OUT-AND/TVI/CVI

TECHNICAL DATA

Item name	2 Channel coaxial video multiplexer
Compatible mode	HDCVI(1080P) / HDTVI(3MP) / AHD(5MP) / CVBS
Interface	BNC port
Power supply input	DC 12V
Transmission distance	0-400M adaptive
Operating temperature	-30C – 50C
Shell material	High quality aluminium alloy materials
Product weight / size	70g/pc / 62*23*23*mm/pc
