

NIGEN[®] NF-68i

Ai Face Recognition Time Attendance and Door Access system

NIGEN NF-68i facial recognition platform is designed to detect and identify human faces and appearances across multiple camera streams with top-tier accuracy and real-time performance. Powered by high-quality, AI-driven algorithms, the system is ideal for instant identification scenarios—whether for secure access control, surveillance, or other critical security applications. Facial recognition technology works by analyzing digital images or video frames to match human faces against a database of stored facial profiles. It accurately verifies identities by measuring and comparing key facial features, ensuring reliable and efficient recognition.
