'H' Series Two Valve Manifolds

Introduction

With many years of manifold development and manufacture Parker Hannifin are able to offer the most comprehensive range of two valve block and bleed manifolds to suit all types of instrumentation installations, specifications and applications.

Now consolidated into one catalogue, selection can be made from a comprehensive range of bodies with a variety of connections and valve positions, optimising installation and access opportunities.

Designed to reduce installation costs and improve safety performance, the consolidation of valves into one unit provides you with a combination of instrument isolation together with bleed/vent and test facilities.

In addition to manufacturing manifolds Parker also produce a comprehensive range of single and twin ferrule high integrity tube fittings. Manufactured in a variety of materials these products are used extensively in the oil, gas, petro-chem, power, processing and many other markets.

By integrating these products, instrument manifolds and tube fittings, Parker can offer unique connection combinations which are specifically designed to eliminate site assembled threaded connectors, ingress of debris and contamination from thread sealant materials which often result in instrument failure, replacement and downtime. Eliminating the use of taper threads, factory assembled and tested connections will ensure improved performance through simpler assembly and installation procedures. This system provides total flexibility of tubing position with positive leak proof connections.

Continuous product development may from time to time necessitate changes in the details contained in this catalogue. Parker Hannifin reserve the right to make such changes at their discretion and without prior notification.

All dimensions shown in this catalogue are approximate and subject to change.

WARNING

FAILURE, IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS AND/OR SYSTEMS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE.

This document and other information from Parker Hannifin Corporation, its subsidiaries and authorized distributors provide product and/or system options for further investigation by users having technical expertise. It is important that you analyze all aspects of your application and review the information concerning the product or system in the current product catalog. Due to the variety of operating conditions and applications for these products or systems, the user, through its own analysis and testing, is solely responsible for making the final selection of the products and systems and assuring that all performance, safety and warning requirements of the application are met.

The products described herein, including without limitation, product features, specifications, designs, availability and pricing, are subject to change by Parker Hannifin Corporation and its subsidiaries at any time without notice.

Offer of Sale

The items described in this document are hereby offered for sale by Parker Hannifin Corporation, its subsidiaries or its authorized distributors. Any Order accepted by Parker Hannifin will be subject to our terms and conditions of sale, copy available on request.

'H' Series Two Valve Manifolds

Standard manifold globe style bonnet design

1. POSITIVE HANDLE RETENTION DESIGN FEATURING BROACHED SQUARE ENGAGEMENT POSITIONED BY THREAD LOCKED GRUB SCREW.

2. "T" BAR
ERGONOMICALLY DESIGNED FOR EASE OF OPERATION. ANTI-TAMPER AND LOCKABLE DEVICES CAN BE SUPPLIED FOR ON SITE RETRO-FIT.

4. GLAND PACKING ADJUSTER
FOR MAXIMUM PACKING STABILITY AND PERFORMANCE, SIMPLE AND EASILY ADJUSTABLE FOR GLAND WEAR COMPENSATION.

6. VALVE BONNET
STANDARD CONSTRUCTION FOR MAXIMUM PRESSURE RATING WITH REPLACEABLE BONNET SEALING WASHER ARRANGEMENT.

8. THRUST BUSH
ANTI ROTATIONAL ADJUSTOR BUSH ENSURES UNIFORM PACKING COMPRESSION, MAXIMISING PRESSURE TIGHT SEALING AND LIMITING COLD FLOW PASSAGES.

10. BONNET/BODY WASHER
ANNEALED SEALING WASHER TO ENSURE COMPLETE ATMOSPHERIC LEAKAGE AND ALLOWING ON SITE RETRO-FIT OF BONNETS WITH 100% RE-SEALING ASSURANCE

For safe reliable and repeatable performance

3. DUST CAP
THIS HAS A DUAL PURPOSE, PREVENTING AIR BORN DEBRIS FROM CONTAMINATING THE OPERATING SPINDLE THREAD AND PROVIDING COLOUR CODED FUNCTIONAL IDENTIFICATION. ISOLATE (BLUE) BLEED/TEST (RED).

5. GLAND ADJUSTER LOCK NUT
A SECURE ANTI VIBRATION LOCKING MECHANISM TO PREVENT INADVERTENT GLAND ADJUSTER LOOSENING.

7. ANTI BLOWOUT SPINDLE
DESIGNED FOR LOW TORQUE OPERATION WITH HIGH QUALITY MICRO MIRROR STEM FINISH FOR POSITIVE GLAND SEALING.

9. GLAND PACKING (ADJUSTABLE)
CHEVRON EFFECT DUAL PIECE GLAND PACKING TO PROVIDE MAXIMUM SEALING AREA CONTACT WITH MINIMUM GLAND ADJUSTMENT.

11. SPINDLE TIP
SELF CENTERING, NON-ROTATIONAL TIP GIVES SUCCESSIVE POSITIVE BUBBLE TIGHT SHUT OFF ASSURING THE USER OF LEAKAGE FREE PERFORMANCE AND DOWNSTREAM FUNCTIONAL SAFETY.

All metallic standard parts are produced in stainless steel, for alternative materials please refer to page 18. Manifolds produced in other specified materials will be provided with non-wetted parts as standard in stainless steel, this applies to items 1, 2, 4, 5 & 8.

Specification

- Height closed (standard and HP) = 47mm (1.85")
Height open (standard and HP) = 50.3mm (2.00")
- Number of turns open/close - 3.5
- Stainless steel construction
- Maximum standard pressure up to 6,000 psig (414 barg)
- Maximum optional pressure (limited to HP suffix see page 8/9) up to 10,000 psig (689 barg)
- Temperature rating -54C to +538C (-65F to +1000F)
- PTFE standard gland packing (Graphoil optional)
- Maximum temperature PTFE 260C (500F)
- Maximum temperature Graphoil 538C (1000F)

Features

- Standard unit throughout manifold range
- Operating threads outside washout area
- Externally adjustable gland
- Low operating torque
- Alternative 10,000 psig (689 barg) range available
- Retro-fit kit for:-
Anti-tamper spindle
Panel mounting
Lockable T bar
Handwheel with lockable option
- Bonnet locking pin to prevent accidental removal fitted as standard
- Alternative graphoil packing for high temperature performance available
- Alternative self centering tip materials available for gaseous and aggressive fluids
- Safety back seated spindle prevents stem blowout and provides secondary back up stem seal
- Packing below threads to prevent lubricant washout
- All valves 100% factory tested
- NACE certified wetted parts available
- Optional cleaned and lubricated suitable for Oxygen service
- Heat code traceable body and bonnet

Pressure vs Temperature

'H' Series Two Valve Manifolds

Optional manifold globe style bonnet design

For on-site assembly

The design options below can be simply retrofit to any "H" series standard manifold. Retrofit kit part numbers are listed next to the illustrated option and all parts will be supplied in stainless steel regardless of the parent body material.

For factory fitted assembly

To obtain factory assembled options the manifold part number must be suffixed with the option and function designator. This allows you to select one or both of the bonnets to be fitted with the selected option or, different options to be fitted to either of the bonnets.

Function designator IS – isolate DR–drain/test.

Example HL*2VATDR – manifold with drain/bleed valve (DR) fitted with anti-tamper (AT). Isolate valve will be standard bonnet design.

Example HL*2VHWISTHLDR – manifold with isolate valve fitted with hand-wheel and drain/bleed valve fitted with "T" bar locking mechanism.

Note: Padlocks for lockable handwheels and "T" bars are not supplied (hole size 6mm/0.24").

Standard bonnet	T bar handle locking	Anti tamper spindle
	 <p>Retro-fit kit part number KITTHL Factory assembled suffix THL</p>	 <p>For key only - part no. ATHKEY/1 Retro-fit kit part number KITATK with key Factory assembled suffix AT without key ATK with key</p>
Handwheel	*Panel mounting	B31.1 Compliant
 <p>Retro-fit kit part number KITHW Factory assembled suffix HW</p>	 <p>Retro-fit kit part number KITPM† Factory assembled suffix PM † Panel mount kit for HP: KITPMHP</p>	 <p>See page 14 for details</p>
Lockable handwheel		
 <p>Retro-fit kit part number KITLHW Factory assembled suffix LHW</p>		

*Panel mounting hole diameter = 26mm (1.02").
Panel thickness = Max 5mm (0.20") Min 2.3mm (.09").

'H' Series Two Valve Manifolds

Remote mount static pressure manifolds

Purpose

This series of two-valve manifolds combine valves into one unitised block to perform isolation, bleed and calibration of pressure transmitters, gauges and switches. Process, instrument and vent connections can be provided in a variety of sizes and thread forms including NPT, BSPT_r and BSPP.

HL*2VTF

HL*2V

HL*2HVSDLH

HAL*2V

Line diagram represents this group of manifolds

HL*28M8F4F

Instrument double block and bleed manifolds

Double block and bleed instrument manifolds for dual isolating and bleed purposes. Ideal for limited space and panel installations.

HL*3DBB

HL*3DBB1

*For material codes see page 18.

For options see pages 19/20.

'H' Series Two Valve Manifolds

Remote mount static pressure manifolds

*Overall width with valves fully open

Standard product specification: self centering metal/ metal seat, PTFE packed, stainless steel, T bar handle operation, 6000 psig (414 barg).

Standard range part numbers

Part No	Inlet (NPT)	Standard connections	
		Outlet (NPT)	Bleed/test (NPT)
HL*2V	1/2" female	1/2" female	1/4" female
HAL*2V	1/2" female	1/2" female	1/4" female
HL*2HVSDLH	1/2" female	1/2" female	1/4" female
HL*2VTF	1/2" female	1/2" female	1/4" female
HL*28M8F4F	1/2" male	1/2" female	1/4" female
HL*3DBB	1/2" female	1/2" female	1/4" female
HL*3DBB1	1/2" female	1/2" female	1/4" female

*Insert material designator, see page 18

Function

Blue cap – isolate,
Red Cap – drain/bleed

Specification

- Maximum standard pressure up to 6,000 psig (414 barg), to ANSI Class 2500
- Temperature rating - see page 4
- Standard port sizes up to 1/2" NPT

Features

- Standard high performance bonnet design
- Colour coded valve function identification
- Alternative materials of construction available
- Optional port sizes and thread forms available: BSPT_r, BSPP
- Socket and butt weld connections available
- PTFree connections available (see page 15)
- Blank and bleed plugs available
- NACE certified on request
- Optional cleaned and lubricated suitable for Oxygen service
- Heat code traceable body and bonnet

'H' Series Two Valve Manifolds

High pressure 10,000 psig (689 barg) two valve manifolds

Purpose

This series of manifolds have been designed for more aggressive applications and for operation up to 10,000 psig (689 barg).

HL*2VHP

Line diagram represents this group of products

HAL*2VHP

HL*28M8F4FHP

Instrument double block and bleed manifolds

Designed for dual isolating and bleed purposes, ideal for limited space and panel installations.

HL*S3DBBHP

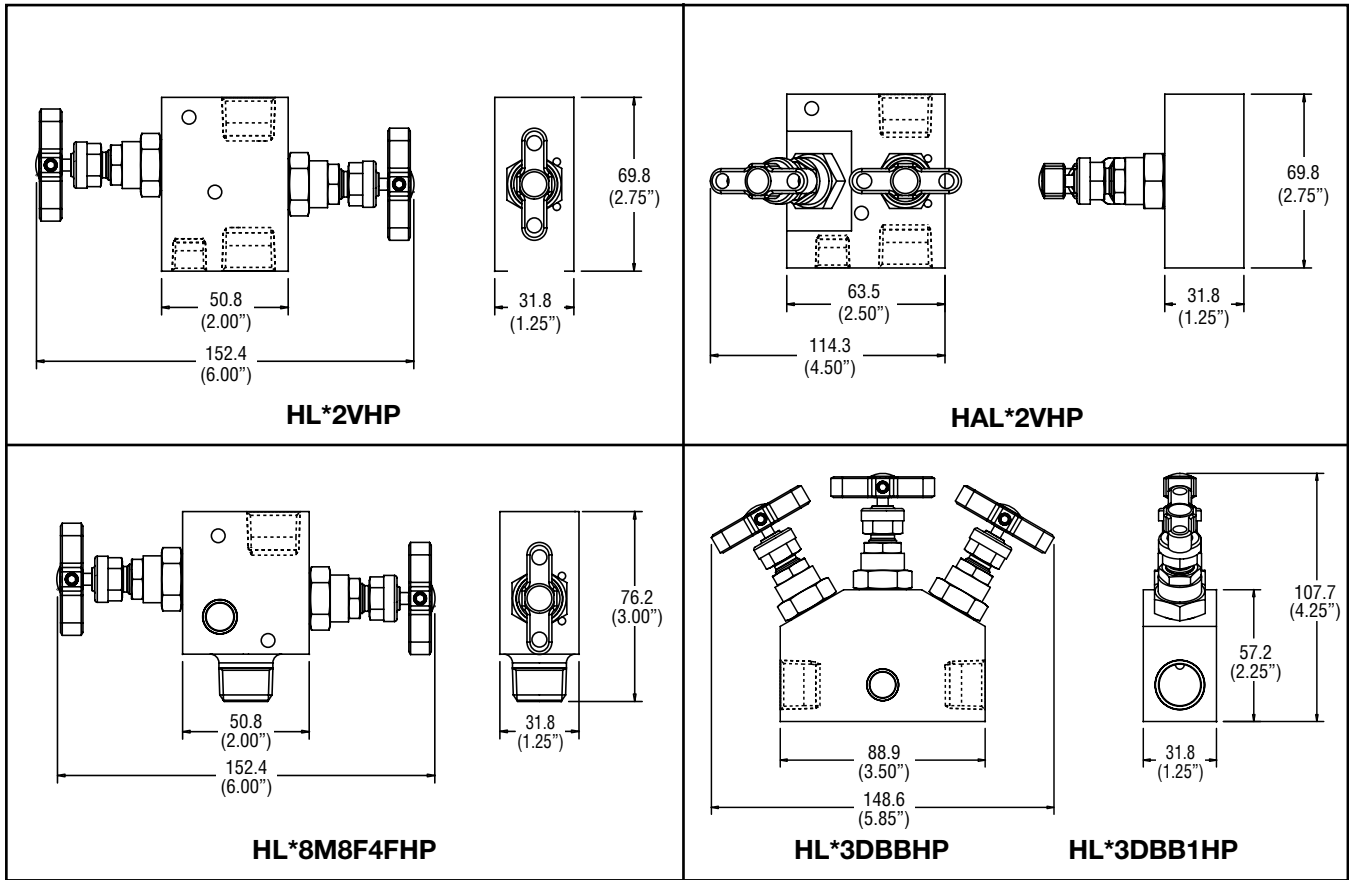

HL*3DBB1HP

*For material codes see page 18.

For options see pages 19/20.

'H' Series Two Valve Manifolds

High pressure 10,000 psig (689 barg) two valve manifolds

*Overall width with valves fully open

Standard product specification: self centering metal/metal seat, PTFE packed, stainless steel, T bar handle operation, 10,000 psig (689 barg).

Standard range part numbers

Part No	Inlet (NPT)	Standard connections	
		Outlet (NPT)	Bleed/test (NPT)
HL*2VHP	1/2" female	1/2" female	1/4" female
HAL*2VHP	1/2" female	1/2" female	1/4" female
HL*28M8F4FHP	1/2" male	1/2" female	1/4" female
HL*3DBBHP	1/2" female	1/2" female	1/4" female
HL*3DBB1HP	1/2" female	1/2" female	1/4" female

*Insert material designator, see page 18

Function

Blue cap – isolate,
Red Cap – drain/bleed

Specification

- Maximum standard pressure up to 10,000 psig (689 barg), to ANSI Class 4500 (St. St.)
- Temperature rating - see page 4
- Standard port sizes up to 1/2" NPT

Features

- Standard high performance bonnet design
- Colour coded valve function identification
- Alternative materials of construction available
- Optional port sizes and thread forms available: BSPT_r, BSPP
- Socket and butt weld connections available
- PTFree connections available (see page 15)
- Blank and bleed plugs available
- NACE certified on request
- Optional cleaned and lubricated suitable for Oxygen service
- Heat code traceable body and bonnet

'H' Series Two Valve Manifolds

Direct mount static pressure manifolds

Purpose

This series of two valve manifolds is designed for direct mounting to process measurement pressure transmitters. Standard functions include isolation, test, bleed and calibration.

HD*2EXT

Base entry enclosure mountable

HD*2HLHFF

Straight through bolted flange

HEF*2LH

Line diagram represents this group of products

HD*2HLH

HEF*2LH8N

HD*2HLHCP

For Model 3051 transmitter

*For material codes see page 18.

For options see pages 19/20.

'H' Series Two Valve Manifolds

Direct mount static pressure manifolds

Overall width with valves fully open

Standard specification: self centering metal/metal seat, PTFE packed, stainless steel, T bar handle operation, 6000 psig (414 barg). Supplied as standard with 1 off PTFE instrument seal and appropriate 7/16" UNF high tensile zinc plated carbon steel bolts.

Standard range part numbers

Part No.	Inlet (NPT)	Standard connections	
		Outlet	Drain/bleed
HD*2EXT	1/2" female	Flanged	1/4" female
HEF*2LH	Flanged	Flanged	1/4" female
HEF*2LH8N	1/2" female	Flanged	1/4" female
HD*2HLHFF	Flanged	Flanged	1/4" female
HD*2HLH	1/2" female	Flanged	1/4" female
HD*2HLHCP	1/2" female	Flanged	1/4" female

*Insert material designator

Function

Blue cap – isolate,
Red Cap – drain/bleed

All manifolds are drilled suitable for bracket mounting - standard manifold support brackets are available.

Straight through flow pattern rising plug valves are available for HEF*2LH and HEF*2LH8N.

*For material codes see page 18. For options see pages 19-20.

Specification

- Maximum standard pressure up to 6,000 psig (414 barg), to ANSI Class 2500
- Temperature rating - see page 4
- Standard port sizes up to 1/2" NPT

Features

- Standard high performance bonnet design
- Colour coded valve function identification
- Alternative materials of construction available
- Optional port sizes and thread forms available: BSPTr, BSPP
- Socket and butt weld connections available
- PTFree connections available (see page 15)
- Blank and bleed plugs available
- NACE certified on request
- Optional cleaned and lubricated suitable for Oxygen service
- Heat code traceable body and bonnet

'H' Series Two Valve Manifolds

Flanged connected static pressure manifolds

Purpose

These manifolds are designed for fast and efficient installation and removal of pressure measurement instruments. Single kidney flange arrangements are provided with optional inlet connections for total installation flexibility, the redundant connection can also be used for purge operations.

The dual flanged model enables users to mount two pressure measuring devices connected to a common inlet, redundant cross-hole connections can be used for process purging.

Kidney flange connections can also be provided with male threaded outlet, A-LOK®, CPI™ or PTFree connections. Closing the isolation valves and operating the bleed valve gives operators the opportunity of venting trapped pressurised fluids to an environmentally safe area. Further access through the bleed connection enables in-situ instrument calibration.

HL*2V1KFMB

HL*2V2KFMB

All manifolds are drilled suitable for bracket mounting - standard manifold support brackets are available.

*For material codes see page 18. For options see pages 19-20.

'H' Series Two Valve Manifolds

Standard dimensions

Overall width with valves fully open

Standard product specification: self centering metal/metal seat, PTFE packed, stainless steel construction, T bar handle operation, 6000 psig (414 barg). Bleed valves fitted with Fluorocarbon Rubber gland seals.

Standard range part numbers

Part No.	Inlet (NPT)	Standard connections	
		Outlet	Bleed/test (NPT)
L*2V1KFMB	2 x 1/2" female	1 x Flanged x 1/2" female	1/4" female
L*2V2KFMB	1/2" female	2 x Flanged x 1/2" female	1/4" female

*Insert material designator

Function

Blue cap – isolate,
Red Cap – drain/bleed

*For material codes see page 18. For option codes see pages 19-20.

Specification

- Maximum standard pressure up to 6,000 psig (414 barg), to ANSI Class 2500
- Temperature rating -40C to +204C (-40F to +400F)
- Standard port sizes up to 1/2" NPT

Features

- Standard high performance bonnet design
- Colour coded valve function identification
- Alternative materials of construction available
- Optional port sizes and thread forms available: BSPT_r, BSPP
- Socket and butt weld connections available
- PTFree connections available (see page 15)
- Blank and bleed plugs available
- NACE certified on request
- Optional cleaned and lubricated suitable for Oxygen service
- Heat code traceable body and bonnet
- Mini bleed valves for compact installation

'H' Series Two Valve Manifolds

Power plant products - compliant with ANSI B31.1

H Series Hand valves & manifolds

Designed and developed from our highly successful H series valves. These products meet the requirements of both ANSI B31.1 (Power plants) and B31.3 (Petrochemical plants), including the materials of construction.

Features

- All valves are graphite packed for high temperature service
- Non rotating, hard stem tip with metal to metal seating for bubble tight shut-off
- Back seat design
- Blow-out proof stem
- Pressures & temperatures in accordance with ASME class 2500
- Patented Tru-Lok safety bonnet locking device prevents accidental removal
- Standard orifice 4mm (Cv 0.35)

Specific pressure / temperature performance

316 SS 6000 psig @ 100°F (414 bar @ 38°C)
 2915 psig @ 1000°F (201 bar @ 538°C)

Plus a range of manifolds:

Part numbering & Product range offered:

For H series valves and manifolds use CAT4190HV; CAT4190PM; CAT4190FM then replace the prefix 'H' with 'HPP'. Eg: HNVS8FF becomes HPPNVS8FF3

Product range:

HPPNVS; HPPGV; HPPBSNVS2; HPPLS2V; HPPLS2HVSDLH; HPPALS2V; HPPLS3M; HPPLS5M; HPPDS2HLH; HPPDS3M; HPPDS5M; HPPEFS2/3/5

Consult factory or come and see us about other options.

'H' Series Two Valve Manifolds

PTFree connect™

Manifold connections

Many users continually desire the elimination of taper threads and their associated sealant.

The PTFree connect™ system enables users to assemble tube lines to any of the manifold ports without the need for PTFE tape or other liquid sealant.

The PTFree connection can be applied to any of the manifold featured in this catalogue. these will be factory fitted, pin locked and pressure tested.

PTFree connect™ enables angled tube connections to be swivelled until the optimum tube alignment position has been achieved. Assembly to the tube connector is achieved by tightening the standpipe nut one-quarter turn from the finger tight position.

Manifolds can also be supplied with male connectors using the same thread form as the PTFree connect™. They can be provided factory fitted, pin locked and tested before they leave our manufacturing plant.

Some size restrictions may be necessary due to the close proximity of some connections and the across flat hexagon dimensions, as a guide PTFree connect™ for inlet and outlet can be up to 1/2" or 12mm o/d., drain/bleed connections should be restricted to 1/4" or 6mm. For PTFree male connectors inlet and outlet should be restricted to 3/8" or 10mm and 1/4" or 6mm o/d for drain/bleed.

A = 29.70mm (1.17") 6mm/1/4" tube
 A = 35.00mm (1.38") 10mm tube
 A = 35.00mm (1.38") 3/8" tube

**PTFree connect™
(Code FRC)**

A = 31.50mm (1.25") 6mm/1/4" tube
 A = 36.60mm (1.44") 10mm tube
 A = 36.60mm (1.44") 3/8" tube

**PTFree male connectors
(Code FRCM)**

Part Number Construction Examples

Part No. HALS2VFRMCMBIE6X6D6N = 2 valve manifold with CPI™ PTFree male connector Inlet 3/8 o.d, Outlet 3/8 o/d Drain/vent/test 1/4" NPT. Stainless steel standard construction						

'H' Series Two Valve Manifolds

Manifold bracket support

Purpose

It is essential to fully support impulse/pressure measurement tubing lines, manifolds and instruments. All Parker manifolds are designed to accommodate bracket mounting and support, a full range of brackets with additional U bolts are available.

Brackets are designed for panel and wall mounting and give full clearance for ease of handle operation. They are also suitable for vertical and horizontal positioning on 2" pipe-stand.

Standard brackets are produced from 4mm thick carbon steel plate to provide maximum rigidity and support. For full corrosion protection the brackets are shot blasted and zinc sprayed.

Alternative bracket material is available upon request.

Part No. BKT1CS

Simple to install bracket for horizontal/vertical 2" stanpipe, wall, panel or base mounting, bracket stand-off prevents handle obstruction.

Suitable for: -

HL*2V
HL*28M8F4F
HAL*2V
HL*2HVSDLH
(Not suitable for HP versions)

For 'U' bolts suffix part no. with B.
Example BKT1CSB

For manifold/bracket bolts add 'bolt set' suffix from matrix.

Example: Bracket, 'U' bolt and manifold/bracket bolts BKT1CSB1 (suitable for H*L2V).

Part No. BKT2CS

Universal manifold mounting bracket suitable for all remote mount manifolds. This bracket allows 90 degree positioning enabling total installation flexibility and prevents handle obstruction

Suitable for the above manifolds and: -

HL*2VTF
HL*3DBB
HL*3DBB1
HAL*2VHP

Suitable for all HP versions

For 'U' bolts suffix part no. with B
Example BKT2CSB

For manifold/bracket bolts add bolt set suffix from matrix.

Example: Bracket, 'U' bolt and manifold/bracket bolts BKT2CSB2 (suitable for HL*3DBB).

'H' Series Two Valve Manifolds

Manifold bracket support

Part No. BKT3CS

Suitable for: -

HD*2HLH
HD*2HLHCP
HD*2HLHFF

For 'U' bolts suffix part no. with B
Example BKT3CSB

For manifold/bracket bolts add bolt set suffix from matrix.
Example: Bracket, 'U' bolt and manifold/bracket bolts BKT3CSB3 (suitable for HD*2HLH).

Universal manifold mounting bracket suitable for all direct mount manifolds. This bracket design enables horizontal or vertical instrument positioning.

Part No. BKT4CS

Suitable for: -

HEF*2LH8N
HEF*2LH

For 'U' bolt suffix part no. with B
Example BKT4CSB

For manifold/bracket bolts add bolt set suffix from matrix.
Example: Bracket, 'U' bolt and manifold/bracket bolts BKT4CSB4 (suitable for HEF*2LH).

For extruded style manifold blocks providing full base support for horizontal or vertical fixing to 2" pipestand.

'U' Bolt with nuts & washers for 2" NB standpipe

Part No. UBACS

Carbon steel standard

Manifold/bracket bolts c/w nuts and washers.

Manifold Part No.	Bolt Set	Part No.	Suffix
HL*2V	M5 x 45 Bolt	BS1	1
HAL*2V	M5 x 45 Bolt	BS1	1
HL*28M8F4F	M5 x 45 Bolt	BS1	1
HL*2HVSDLH	M5 x 45 Bolt	BS1	1
HL*2VTF	M5 x 45 Bolt	BS1	1
HL*3DBB	M10 x 14 Bolt	BS2	2
HL*3DBB1	M10 x 14 Bolt	BS2	2
HD*2HLH	M6 x 14 Bolt (1-OFF) M10 x 14 Bolt (1-OFF)	BS3	3
HD*2HLHFF	M6 x 14 Bolt (1-OFF) M10 x 14 Bolt (1-OFF)	BS3	3
HD*2HLHCP	M10 x 14 Bolt (2-OFF)	BS2	2
HEFS2LH	M6 x 45 Bolt	BS4	4
HEFS2LH8N	M6 x 45 Bolt	BS4	4

All nut and bolt sets are standard in Carbon Steel

7	Mounting	Note 5 Assembled to bracket	BRK	✓		
8	Condition	NACE (latest issue)	NACE	✓		
		Cleaned and lubricated for oxygen use	OXY	✓		
		Firesafe	FS	✓		
		Note 6 Heat code trace certificates	HCT	✓		
		Test certificates	TC	✓		
		Air testing	PT	✓		

Note 1 Seat material RP=standard acetal, RP9 = PTFE, RPPK = PEEK.

Note 2 For tube socket or tube butt weld use 1/16 inch denominations and change NB to TB.
For metric tube size use actual metric (mm) dimensions e.g. SW12MMTB.

Note 3 Insert seal type 'B1', 'B2', 'B3'.

Note 4 For BSPP connections drain/bleed will be 1/8 BSPP.

Note 5 Bracket will include 'U' bolt & manifold/bracket bolts.

Note 6 Heat code traceable certificates for body and bonnet.
