Rothenberger ROCOOL 600

Key Features

•Modular system: The basic device can be fitted with the Red Box incl. the Data Viewer software for reading out or recording data on a PC (only for 1000000572 model).

• Additionally there is an optional external Pirani vacuum probe for precise vacuum readings.

•More than 70 refrigerants incl. R744 (sub-critical) are stored in the device. New refrigerants can be added later using the update function.

•Simultaneous calculation of superheat and sub-cool with Temperature Clampers.

•The documentation software Data Viewer generates an automatic report based on the data recorded. Ideal for handing out to the customer (client).

•An external Pirani vacuum probe allows reading of the vacuum where the most precise measurement is possible: directly at the refrigeration system.
