

# Are you breeding Legionnaire's Disease?

## Used regularly, Anti-Clog #1 is the ideal antidote

Where there's cooling equipment, there's often trouble. Why? Air conditioner and refrigeration drain pans are breeding grounds for slime, sludge and toxic bacteria like Legionella, all of which can cause major health and maintenance issues.

*What if you could combat these problems—simply, easily and efficiently?*

You can with Anti-Clog #1, the drain-pan maintenance product that's so effective, it's registered by the Environmental Protection Agency (EPA). In fact, it's the *only* product permitted by the EPA to make a Legionella-kill claim.

As powerful as it is compact, Anti-Clog #1 eliminates:

- 99% of Legionella (Legionnaire's Disease bacteria)
- Other harmful bacteria, including those that cause the common cold
- Clogging and drain-pan overflows caused by slime build-up
- Air-duct contamination
- Musty odors caused by bacterial-slime accumulation

A snap to install, Anti-Clog #1 contains the highest amount of biocide of *any* product on the market and fits small and large equipment—from under three tons to well over 45 tons. Each unit begins working immediately and continuously, 24 hours a day for three months. Plus, its unique, weighted design won't float away or clog drain ports.

### **Slim Strip**

(6 1/2" L x 1 1/2" W x 5/16" H)

- For equipment up to 3 tons
- Fits easily into condensate pans with low profiles

### **FT/C**

(2 3/4" L x 2 3/4" W x 1/2" H)

- For equipment up to 5 tons
- Our most popular size

### **AT/C**

(3 5/8" L x 2 3/4" W x 7/8" H)

- For up to 15 tons

### **The Brick**

(8 1/8" L x 2 13/16" W x 1 1/4" H)

- For up to 45 tons

Available in four tamper-proof, easy-to-use sizes. For larger equipment, use multiple units.
