FEATURES & SPECIFICATIONS

The New, Versatile and Flexibility in Commercial Air Conditioning System

- Chilled Water Furred-in model with Plenum Fan Coil units.
- The low silhouette styling of this unit makes it a popular choice for the “in-the-ceiling” or “over the closet” applications in all types of building.
- Horizontal ducted application. The 40LM150 & 200 can easily be converted to vertical (floor standing) ducted application.
- Insulated & painted condensate drain pan and a factory fitted frame complete with filter media. (Filter media is optional for 40LM150 & 200).
- Integral filter frame with 2” filter media as standard (frame capable of adapting 1” filter media).
- 40LM120 is standard factory supplied with 3-speed direct drive motor.
- 40LM150 & 200 is standard factory supplied with TEFC Induction motor and taper lock pulleys with wedge belts.
- Standard copper tube aluminum fins (Cu/Al) evaporator coil for maximum heat transfer.
- Carrier Lanced Sine Wave fin pattern ensures energy efficient performance.
- Units piping connection as below (in the direction of air flow):
 - a) 40LM120 → LEFT-HAND CONNECTION
 - b) 40LM150~200 → RIGHT-HAND CONNECTION (Vertical)
LEFT-HAND CONNECTION (Horizontal)

TYPE		CHILLED WATER FAN COIL

	ALT	3.7	-	-	-	-	-	335.8 ± 40		-0.062

Note:

Above data are based on IEC standard motor size.

Equation 1: Pulley Diameter

$$PD_f = \frac{D_m \times RPM_m}{RPM_f}$$

$$PD_m = \frac{PD_f \times RPM_f}{RPM_m}$$

PD_f Fan pulley pitch diameter (mm)

PD_m Motor pulley pitch diameter (mm)

RPM_f Fan speed

RPM_m Motor speed

L_b V belt length (mm)

L_w Center line distance (mm)

S_b V belt size

Equation 2: V Belt Length (mm)

$$L_b = 2 \times L_w + \frac{\pi(PD_m + PD_f)}{2} + \frac{(PD_m - PD_f)^2}{4 \times L_w}$$

Equation 2: V Belt Length (mm)

$$S_b = \frac{L_b}{25.4}$$

Part 1 – GENERAL

1.1 System Description

Horizontal, furred-in, above ceiling for ducting room fan coil unit (40LM120). Horizontal or vertical (floor standing) ducted fan coil unit (40LM150/200).

1.2 Quality Assurance

Unit shall be tested in accordance with ARI Standard 440. Each coil shall be factory tested for leakage at 400 psig air pressure with coil submerged in water. Factory is ISO-9001 certified.

1.3 Delivery Storage and Handling

Each unit shall be individually packaged from point of manufacture. Units shall be handled and stored in accordance with the manufacturer's instructions.

Part 2 – PRODUCTS

Equipment

2.1 General

Factor assembled draw through fan coil unit with horizontal, furred in above ceiling for ducted installations (40LM120) and horizontal or vertical (floor standing) for ducted installation (40LM150/200).

2.2 40LM120

Base unit with factory installed plenum section and cleanable filter as shown on equipment drawings. The plenum shall be rear air return. Shall enclose the fan/motor assemblies and shall be lined with 12.7mm thick PU insulation 18kg/m³ density and 6.0mm PE insulation 33kg/m³ density on the drain pan. Unit shall have a removable panel to provide access to fan/motor assemblies and unit identification label.

2.3 40LM150/200

Unit can be installed in vertical installation or hanging in horizontal installation. The inner insulation of 12.7mm PU insulation 18kg/m³ and 6.0mm PE insulation 33kg/m³ on the drain pan and include a removable panel to provide access to the fan/ motor assembly.

2.4 Fan

Direct driven (40LM120) or belt driven (40LM150/200) double width fan wheel with forward curved blades shall be statically and dynamically balanced. Fan wheels shall be constructed of high density reinforced polypropylene. (40LM120) or fan wheels shall be constructed of steel (40LM150/200).

2.5 Coils

Drain pan covers entire length and width of coil till the headers. Drain pan inside coated and outside insulated. Standard base unit shall be equipped with a 4-row coil for installation in a 2-pipe system. Coils shall have 9.5mm copper tubes, aluminum fins bonded to the tubes by mechanical expansion. Each coil shall have a manual air vent and threaded connections field piping. Working pressure 1.72 Mpa, 0.105mm fin thickness and 0.24mm tube wall thickness.

2.6 Operating Characteristics

A one coil unit installed in a 2-pipe system shall be capable of providing cooling as determined by the operating mode of the central water supply system.

2.7 Electrical Requirements

Standard unit shall operate on 230V±10%, single phase, 50Hz for 40LM120 and 400V±/-10%V/3pH/50Hz electrical supply for 40LM150/200.

2.8 Motor(s)

- a) 40LM120 fan motors shall be 3-speed, 230V, single phase, 50Hz permanent split capacitor type, with ball type bearings and over-sized oil reservoirs to ensure lubrication. The fan motor(s) shall be equipped with integral automatic temperature reset for motor protection. Motor insulation is Class B with IP20 ingress protection.
- b) 40LM150/200 shall be with totally enclosed fan cooled (TEFC) high efficiency motors with belt driven. Motor insulation is Class F with IP55 Ingress Protection.

2.9 Filter

Permanent washable synthetic media filters with 1" thick for 40LM120 and 2" thick for 40LM150/200 with G2 filter class as per European Union EN779.
