## 2. HAZARDS IDENTIFICATION

### **Emergency Overview**

Color:

Clear - colourless

Physical state:

gas

Form:

Liquefied gas

Odor:

Slightly ether-like

# CAUTIONI

HIGH PRESSURE GAS.

LIQUID AND GAS UNDER PRESSURE.

OVERHEATING OR OVERPRESSURE.

OVERHEATING OR OVERPRESSURE MAY CAUSE GAS RELEASE OR VIOLENT CYLINDER BURSTING, MAY DECOMPOSE ON CONTACT WITH FLAMES OR EXTREMELY HOT METAL SURFACES TO PRODUCE TOXIC AND CORROSIVE PRODUCTS.

VAPOR REDUCES OXYGEN AVAILABLE FOR BREATHING AND IS HEAVIER THAN AIR.

MAY CAUSE FROSTBITE.

MAY CAUSE HEADACHE, NAUSEA, DIZZINESS, DROWSINESS, LOSS OF CONSCIOUSNESS.

MAY CAUSE EFFECTS ON:

HEART

## Potential Health Effects

Primary routes of exposure:

Inhalation and skin contact.

Product code: 04070

Version 1.0

issued on: 01/15/2009

Page: 1 / 12

#### FORANE ® 407C

Signs and symptoms of acute exposure:

Liquid: Rapid evaporation of the liquid may cause frostbite. Vapor: Vapor is heavier than air and can cause suffocation by reducing oxygen available for breathing. Central nervous system effects: headache, nausea, dizziness, drowsiness, loss of consciousness. Stress induced heart effects: irregular heart beat, rapid heart beat, (severity of effects depends on extent of exposure).

#### Skin

Slightly irritating. (based on components)

#### Inhalation:

Practically nontoxic. (based on components)

#### Eves

Slightly irritating. (based on components)

# Medical conditions aggravated by overexposure:

Heart disease or compromised heart function.

3. COMPOSITION/INFORMAT	ION ON INGREDIENTS
Chemical Name	242.11

Chemical Name	CAS-No.	Wt/Wt	OSHA Hazardous
Ethane, 1,1,1,2-tetrafluoro-	811-97-2	52 %	. Y
Ethane, pentafluoro-	354-33-6	25 %	Y
Methane, difluoro-	75-10-5	23 %	Y

The substance(s) marked with a "Y" in the Hazard column above, are those identified as hazardous chemicals under the criteria of the OSHA Hazard Communication Standard (29 CFR 1910.1200).

This material is classified as hazardous under Federal OSHA regulation.

#### 4. FIRST AID MEASURES

### Inhalation:

If inhaled, remove victim to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention.

#### Skin:

If on skin, flush exposed skin with lukewarm water (not hot), or use other means to warm skin slowly. Get medical attention if frostbitten by liquid or if irritation occurs. Wash clothing before reuse. Thoroughly clean shoes before reuse.

#### Eves

Immediately flush eye(s) with plenty of water.

#### Ingestion:

Ingestion is not applicable - product is a gas at ambient temperatures.

#### Notes to physician:

Do not give drugs from adrenaline-ephedrine group.

# 5. FIRE-FIGHTING MEASURES

Flash point

Not applicable

Auto-ignition temperature:

not determined

Lower flammable limit (LFL):

None.

Upper flammable limit (UFL):

Extinguishing media (suitable):

Use extinguishing measures to suit surroundings.

Protective equipment:

Fire fighters and others who may be exposed to products of combustion should wear full fire fighting turn out gear (full Bunker Gear) and self-contained breathing apparatus (pressure demand / NIOSH approved or equivalent) Fire fighting equipment should be thoroughly decontaminated after use.

Further firefighting advice:

Keep containers cool by spraying with water if exposed to fire.
Water mist should be used to reduce vapor concentrations in air.

Fire and explosion hazards:

May decompose on contact with flames or extremely hot metal surfaces to produce toxic and corrosive products. Liquid and gas under pressure, overheating or overpressurizing may cause gas release and/or violent cylinder bursting.

Container may explode if heated due to resulting pressure rise.

Some mixtures of HCFCs and/or HFCs, and air or oxygen may be combustible if pressurized and exposed to

When burned, the following hazardous products of combustion can occur: Hydrogen fluoride

# 6. ACCIDENTAL RELEASE MEASURES

In case of spill or leak:

Use Halogen leak detector or other suitable means to locate leaks or check atmosphere. Keep upwind Evacuate enclosed spaces and disperse gas with floor-level forced-air ventilation. Stop the leak if you can do so without risk. Consult a regulatory specialist to determine appropriate state or local reporting requirements, for assistance in waste characterization and/or hazardous waste disposal and other requirements listed in pertinent environmental

# 7. HANDLING AND STORAGE

#### **Handling**

## General information on handling:

Avoid breathing gas. Keep container closed Use only with adequate ventilation Do not enter confined spaces unless adequately ventilated. Use equipment rated for cylinder pressure Use a backflow preventative device in piping. Wash thoroughly after handling. Close valve after each use and when empty. Emptied container retains vapor and product residue. Observe all labeled safeguards until container is cleaned, reconditioned or destroyed.

### Storage

# General information on storage conditions:

Store in well ventilated area away from heat and sources of ignition such as flame, sparks and static electricity.

Storage stability – Remarks:

Do not apply direct flame to cylinder. Do not store cylinder in direct sun or expose it to heat above 120 F (48.9 C.).

# Storage incompatibility - General:

Keep away from oxidising agents and strongly acid or alkaline materials.

## Temperature folerance - Do not store above:

118 °F (48 °C)

Only those components with exposure limits are printed in this section. Limits with skin contact designation above have skin contact effect. Air sampling alone is insufficient to accurately quantitate exposure. Measures to prevent significant cutaneous absorption may be required. Limits with a sensitizer designation above mean that exposure to this material may cause allergic reactions.

Engineering controls:

Investigate engineering techniques to reduce exposures below airborne exposure limits. Provide ventilation if necessary to control exposure levels below airborne exposure limits (see above). If practical, use local mechanical exhaust ventilation at sources of air contamination such as open process equipment.

Respiratory protection:

Avoid breathing gas. Where airborne exposure is likely or airborne exposure limits are exceeded (if applicable, see above), use NIOSH approved respiratory protection equipment appropriate to the material and/or its components (full facepiece recommended). Consult respirator manufacturer to determine appropriate type equipment for a given application. Observe respirator use limitations specified by NIOSH or the manufacturer. For emergency and other conditions where there may be a potential for significant exposure or where exposure limit may be significantly exceeded, use an approved full face positive-pressure, self-contained breathing apparatus or positive-pressure airline with auxiliary self-contained air supply. Respiratory protection programs must comply with 29 CFR § 1910.134.

Skin protection:

Wear appropriate chemical resistant protective clothing and chemical resistant gloves to prevent skin contact. Consult glove manufacturer to determine appropriate type glove material for given application. Rinse immediately if skin is contaminated. Wash contaminated clothing and clean protective equipment before reuse. Wash thoroughly after handling.

Eye protection:

Use good industrial practice to avoid eye contact.

Skin Sensitization:

Repeated skin exposure, (guinea pig) No skin allergy was observed.

Repeated dose toxicity

Repeated inhalation administration to rat / No adverse systemic effects reported

Genotoxicity

Assessment in Vitro:

No genetic changes were observed in laboratory tests using: bacteria, animal cells

Genotoxicity

Assessment in Vivo:

No genetic changes were observed in laboratory tests using: animals

<u>Developmental toxicity</u>
Exposure during pregnancy, inhalation (rat and rabbit) / No birth defects were observed. (delays in development, at doses that produce effects in mothers)

# 13. DISPOSAL CONSIDERATIONS

Waste disposal:

Do not vent the container contents, or product residuals, to the atmosphere. Recover and reclaim unused contents or residuals as appropriate. Recovered/reclaimed product can be returned to an approved certified reclaimer or back to the seller depending on the material. Completely emptied disposable containers can be disposed of as recyclable steel. Returnable cylinders must be returned to seller. Dispose of in accordance with federal, state and local regulations. Consult a regulatory specialist to determine appropriate state or local reporting requirements, for assistance in waste characterization and/or hazardous waste disposal and other requirements listed in pertinent environmental permits. Note: Chemical additions to, processing of, or otherwise altering this material may make this waste management information incomplete, inaccurate, or otherwise inappropriate. Furthermore, state and local waste disposal requirements may be more restrictive or otherwise different from federal laws and regulations.
