**MFP-1650 Pre-stretch Pallet Wrapper is suitable for container transportation and bulk packaging of goods. It is widely used in many industries. It's main performance has been greatly optimized. The side position design of the mould base makes it have a higher stretch ratio, stronger durability, lower film narrowing rate, better safety which reduces cargo damage during transportation. It can be converted into top pressing type and fully automatic type according to requirements.**

Specifications	Model MFP-1650
Wrapping specification	(600-1,200mm) × (500-1,100mm) (L×W)
Wrapping height (maximum)	2,400mm
Turntable speed	0-15 revolutions, adjustable turntable speed
Diameter of turntable	1,650mm
Turntable height	78mm
Turntable load capacity (maximum)	2,000kg
Membrane frame	Pre-stretch pallet wrapper, pre-stretch up to 300%, adjustable film frame speed
Lift system	Double chain structure, adjustable lifting speed
Machine size	2,745mm×1,500mm×2,780mm
Total weight	500kg
Total power/voltage	1.6kw AC220V/50hz
Control system	PLC control, adjustable wrapping layers, automatic reset of the turntable, automatic height measurement by photoelectric switch

**\*Special specifications can be customized**
