

# Rubber Oil Glue

## Rodent Control Management

Rubber Oil Glue is designed for those who control rat population with big quantity glue trap. Rubber Oil Glue is almost odorless and made from non-toxic raw material and suitable to use it at factory, plantation area, poultry farm, shopping center, restaurant and hospital.

The unique texture of Rubber Oil Glue make it suitable to stick any sizes of rat. Rubber Oil Glue can be apply on cardboard or a plastic tray with the quantity amount around 50-60 gram (12 inch X 12 inch ).

Once you have set up the tray and applied glue, put some attractant (Detex, Provoke and etc) on the glue. This will make the rats cross the sticky tape as they try to get food. Eventually, they will be trapped!
