

## Folding Glue Board – Plastic (FGB-P)

Plastic Folding Glue board are using 100% recycle material Polypropylene which disposed of from factory. We add in Oxo-Biodegradable agent to make it decompose under UV from sun light.

The design of FGB-P is for rodent control at some sensitive area which not allow to apply rodenticide. It can be fold as a tunnel shape to fit into Tamper Resistance Rat Bait Station model XW and it can work as a glue trap itself. It also suitable to place at the places wet and moisture.

FGB-P is Malaysia's best-selling plastic rat glue trap. An innovative idea to less rely on paper and recycle those unwanted material for rodent control.

Strongly adhesive, odourless, ready to use, safe and sanitary.

This units can fit into TRBS XW as a rat glue trap for indoor control.
