

Polycarbonate Sheet

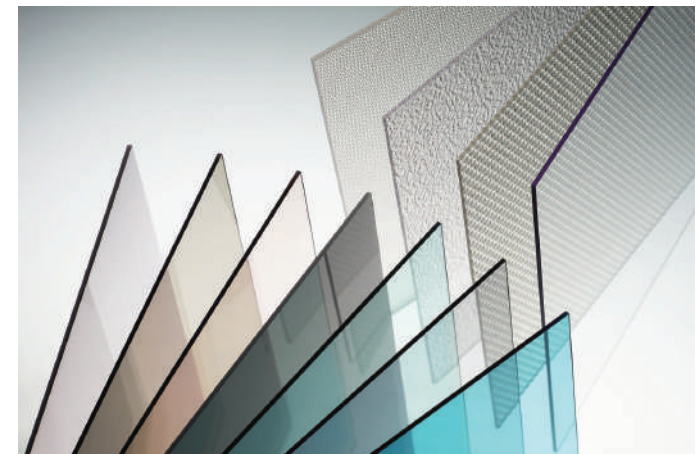

Product Informations

Offering High Quality Commercial Use Polycarbonate Sheet

Enigma is a leading global plastic specialist with world class manufacturing capabilities offering a high quality of polycarbonate sheets like PC Corrugated, PC Emboss, PC Solid, PC Hollow, PC Liner, Industry roofing and now PC roofing have been designed for commercial markets.

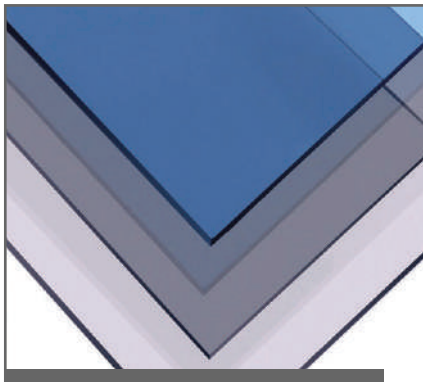

Polycarbonates are characterized by an excellent combination of toughness, transparency, heat and flame resistance and dimensional stability. It is high performance plastic sheets which directly competitive product on the market today. Combining strength, impact resistance over 200 times equivalent thickness of glass and very high transmission. PC also is approved for food contact application.

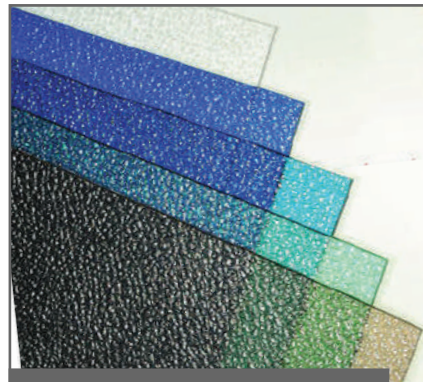

Features & Benefit

- Light weight
- Flexible, fomable, machinable
- Easy handling
- Heat insulation
- Weather resistance (UV shield)
- High impact & break resistance
- Fire-retardant
- Wide range of colour selection
- Cost & energy saving
- Recyclable
- Corrosion resistance to most chemicals
- Highly flexible
- Self-extinguishing

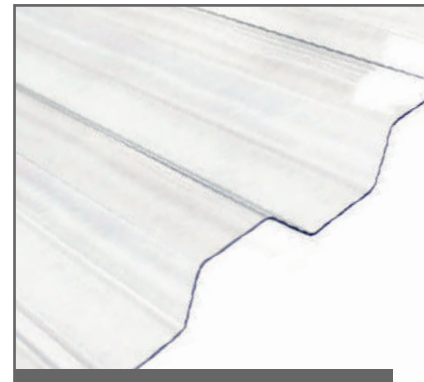

Types of Polycarbonate Sheet

PC Solid

Emboss

Industrial Roofing

Corrugated

Hollow
