**01 / Original design,World' s first pioneer**

**02 / Dieless cutting**

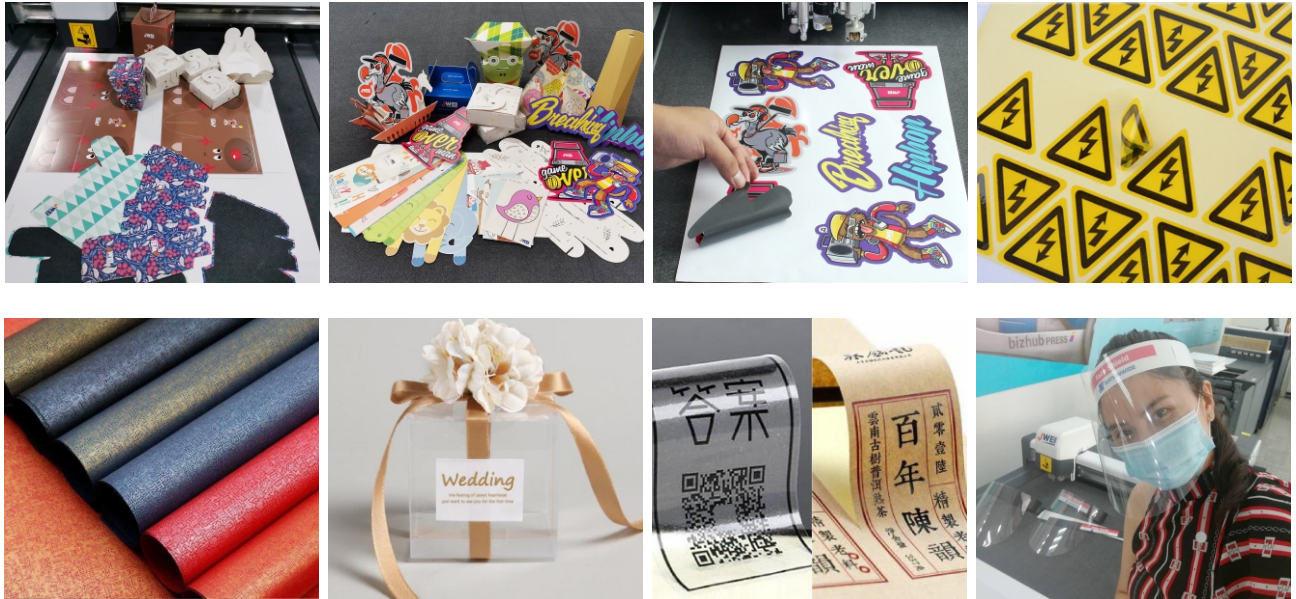

**03 / Customized,small quantity,Unmanned**

**04 / MINI oscillating tool, bevel cutting function**

Can achieve requirements of sheet materials by oscillating tool under 6MM and high-speed and high-precision creasing for box with paperboard and gray board materials.

**05 / B3 mode - Triple Pass**

## Applications

## Parameters

JWEI reserve the rights of final explanation, no further information for any exchanging.

Type	LST03II-0912-RM
Auto feeder	
Auto sheet capacity	<100mm
Feeding system	Vacuum feed with clamps mounted on gantry
Max. sheet size	900MMX1200MM
Min. sheet size	210MMX297MM
Standard tools	CCD camera, electric oscillating tool, full-cut tool, half-cut tool, creasing wheel,
Optional	Bevel cutting tool, Creasing wheel tools for corrugated board
Cutting system	
Productivity	15 secs - 45 seconds per SRA3 sheet (average 24 seconds - depending upon complexity) 70 sec/B2 sheet (varies depends on complexity of material)
Max. cutting speed	1200mm/s
Cut thickness	=6mm
Repeat accuracy	±0.1mm
Software and connection	
File form	PLT?DXF?XML?CF2
Interface	Ethernet Port
Connection	LAN
Green Credentials	
Voltage	220V ± 10%/50HZ
Power	4KW
Weight	380KG
Size	2598mmx1975mmx1148mm
