GROUP DISCUSSION 12: Introduction to File-Based Database

QUESTION:

What are the key differences between file-based databases and relational databases like MySQL or SQLite? In what scenarios would a file-based database be a better choice?

OBJECTIVE:

Students will learn more on identifying when a file-based database is a better choice, such as for lightweight applications, local storage needs, or simple data management.

TIME ALLOCATED:

20 mins – discussion in the breakout room

5 mins – presentation by each group

ANSWER:

SKILL BASED
IT TRAINING
