

S01

S01

Pneumatic workshop machine suitable for the construction of **cross-over special fittings** by means of thermo-forming segments of Polypropylene Random (PP-R) pipe.

The **S01** features:

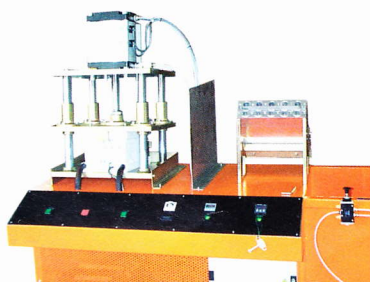

- a pneumatic cutter for cutting segments of pipe to size with a box for collecting the pieces;
- a heating unit able to prepare up to 10 pipe segments, ranging from \varnothing 20 to \varnothing 32 mm;
- a cooling unit with relative dies to set the curvature wanted.

S02

SUPPLIED WITH

- **Single station machine body** complete with cutter, box for collecting the pieces, heater, cooler and a die for each diameter previewed (from \varnothing 20 to \varnothing 32 mm).

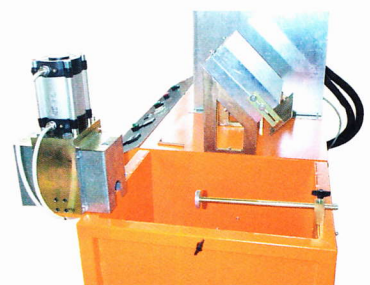

S02

Pneumatic workshop machine suitable for the construction of **cross-over special fittings** by means of thermo-forming segments of Polypropylene Random (PP-R) pipe.

The **S02** features:

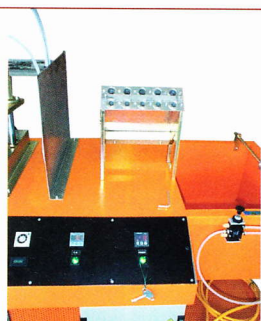

- a bench with pneumatic cutter for cutting segments of pipe to size with a box for collecting the pieces, and a heating unit able to prepare up to 10 pipe segments, ranging from \varnothing 20 to 32 mm;
- a dual-station pressing bench with built-in cooling unit.

Cutter and box
(for collecting the pieces)

SUPPLIED WITH

- **Bench** complete with cutter, box for collecting the pieces, and heater;
- **Dual station pressing bench** with cooler and two dies for each diameter previewed (from \varnothing 20 to \varnothing 32 mm).

Heater
