PIPE SCRAPERS

RTC 160 - RTC 315 - RTC 710

These professional tools, designed and patented by Ritmo, are essential to prepare the plastic pipes and fittings before electrofusion.

The **RTC 160**, **RTC 315** and **RTC710** pipe scrapers remove the oxidation layer caused by weather and ultraviolet rays. They are made with a special Aluminium alloy and are very practical and manageable.

Among the main construction features there is a device that makes it possible to maintain the thickness of the continuous chip constant, even if the pipe is misshaped, and to adjust the amplitude of the surface to scrape according to the depth of the electrical coupler. The RTC710 has furthermore an extentionable arm to scrape the exact length of the electrical coupler, which is an advantage when having to perform repairs in the building site.

The RTC160 and 315 are composed of different adapters to cover all working diameters. All models are supplied with a spare blade, a transport case (2 for RTC 710) and service tools.

SUPPLIED WITH

Both models are supplied with:

- **Pipe scraper;**
- **Adapters kit** (for the RTC 160 and RTC 315);
- **Spare blade;**
- **Handwheel key** (for the RTC 315);
- **Screw driver** and **small cutter;**
- **Transport case** (2 for RTC 710: 1 for Arm; 1 for Mandrel).

MANUAL SCRAPER

This manual tool is used with the same principle as the RTC pipe scrapers. The **MANUAL SCRAPER** features a practical plastic handle and a carbon steel blade, interchangeable with four cutting edges.

SUPPLIED WITH

- Scraper complete with a four-cutting edges blade.
