

RONDISH WIRELESS FlexCare™ NURSE CALL SYSTEM

CMD-11

- *Systems proven to reduce falls*
- *Suitable for domestic & professional care*
- *Improved quality of care*

Product Description

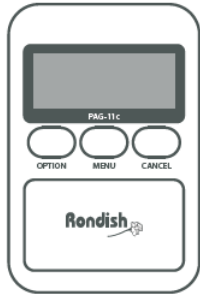

Wireless nurse call systems provide more flexibility for expansion over wired systems, and cause less disruption to care routines and residents during installation. Installation costs are considerably less than wired systems with simplified fault finding and cure. The Rondish FlexiCare™ Call Station is a system designed for nurse call in small-scale nursing homes or memory care facilities with 4 to 8 persons. It offers flexibility in customized settings for different care environment. It receives nurse call signals from up to 60 devices including nurse call buttons, emergency pull cord button, wireless sensor pads and floor mats.

Specification
