Lighting retrofit - Infinops

04/05/2018

Extremely Pleased

Good Day

Over the past 2 years, the Singapore American School has used both CoolLED and InfinOps for our lighting retrofit of large and small spaces. We have been impressed with your service most of all, but also your products which have been stellar.

Twice, we have put your products in a mock-up line with 3 other products, notably in our Middle School library last year. Your LED downlights were the overwhelming choice for the librarians, teachers, and students. Even so, your lights were the most cost effective in that instance as well as the lowest wattage. You hit the magic space of best quality, best product, lowest cost, and most energy efficient all in one product. It was a similar case for our high bay lights in our gyms. Our games have never looked so good, and the color temperature has been completely transformed for the better.

I wanted to take this opportunity to thank you for the work on our school and making it a better place for our students and community. Please keep up the good work. Your products are second to none.

Thank you.
