**Letters of Reference**

Attention : Mr.Soni S

c/o PT. TANGGUH BEJO ELEKTRIK

Dear Sir,

Re :CoolLED LED lighting project in PT NPCT1

It was my great pleasure working with your team for our lighting replacement project at PT NPCT1

At 2019, We have helped Our Customer PT New Priok Container Terminal One (PT NPCT1) installed more than 106 units of CoolLED H3370 (highbay lamps) and F2280 (floodlights) on their port cranes at PT NPCT1. The Customer was very pleased with the results. They have managed to reduce their electricity consumption and at the same time gets better lighting performance for their cranes. They have also seen lower rate of failures and lighting decay on the cranes.

Our chance of getting new lighting replacement projects at the terminal and other terminals in TanjungPriok has never been better.

Thank you and happy cooperations !

Yours truly,

Paulus Kokok Parwoko  
Direktur
