

## SS-1010/SS-1010R/SS-2010 Speaker Selector

## **Speaker Selectors**

TOA Speaker Selectors are designed to effectively select required speaker zones in a public address system and is ideal for small to medium-sized installation. Up to 10 speaker zones for paging and background music can be selected. For all models, in the situation where announcements have to be made to all zones, an All Call button can be selected to broadcast the message to all areas. For SS-1010 & SS-1010R previously selected BGM zones will be mute when paging is done to other zones. With the SS-2010, uninterrupted background music setup can be configured so that paging in one zone does not affect the background music in other zones.

## Features:

- DC 24 V operation
- · LED indicator for each selector
- 1U 19" rack size

- 10 selectors for paging & background music for SS-1010R & SS-2010
- 1 selector for all call (paging)
- Protection against DC input overload and reversed DC polarity installation

## **Specifications**

SS-1010 AS	SS-1010R AS	SS-2010 AS
24V DC		
0.4	A DC	0.6 A DC
0 Inputs Zone Emergency Override	10 Inputs BGM/Paging, 1 Link as Input/Output	10 Inputs BGM 10 Inputs Paging
