

# IVSS2.0 — IVSS7000-I Series

Robust AI computing empower rich applications

## IVSS

Dahua Technology, a leading solution provider in the global video surveillance industry, has launched its new generation deep-learning powered NVR, offering advanced Artificial Intelligence features for a variety of applications. IVSS-I enables faster video content inquiry and rapid discovery of target objects. This opens up new possibilities for danger prevention, along with real-time alerts for the video surveillance industry.

### Intelligent Video Surveillance Server

Deep Learning Algorithm

Network Video Recorder

Extensible GPU

IVSS

### Face Recognition

The AI-powered face recognition technology behind these products enjoys a high reputation in the industry, winning several first prizes in international competitions. Being acknowledged on performance for both efficiency and accuracy, Dahua Face Recognition could alarm for suspects on blacklist, allow passing for authorized people on whitelist, also alert for approaching of strangers.

Similarity: 90%

Common Mode

Stranger Mode

### AI Search

Constituted with feature attribute information extracted from target faces, such as gender, age, glasses, masks, beard and expressions, metadata makes it possible to do smart search by comparison between the modeled object and database or matching with identity characteristics, which significantly enhances accuracy and efficiency.

#### Metadata Search

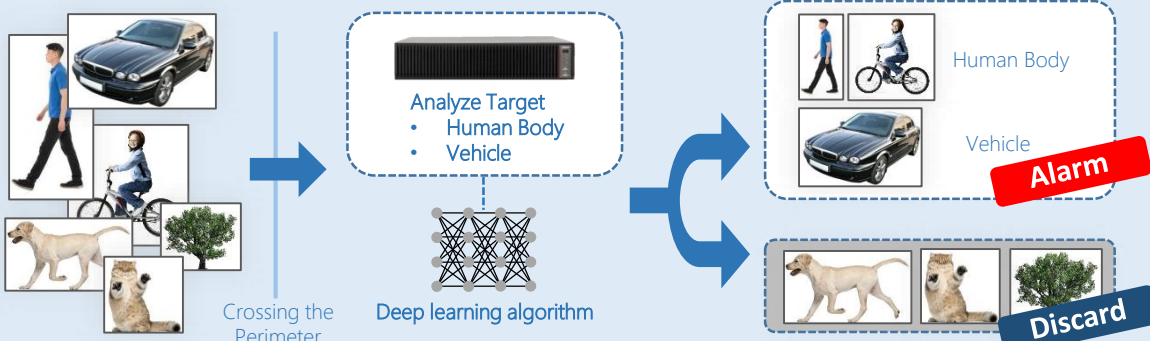

#### Image Search

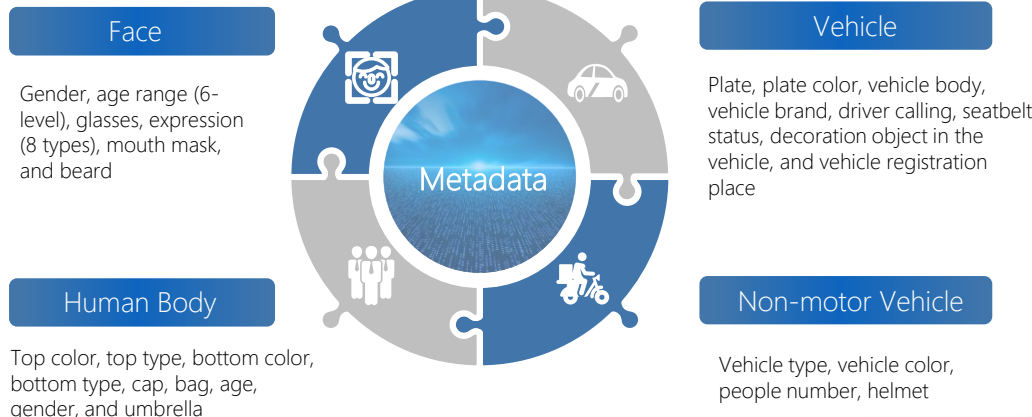

### Perimeter Protection

Perimeter protection function can realize human and vehicle classification, reducing false alarm caused by animals, camera shaking, grasses or other irrelevant objectives with higher precision

### Metadata

Metadata of Face, Vehicle, Human body, Non-motor vehicle makes it much easier for users to locate the interested objects.

### New GUI

Traditional NVR GUI is lack of extensibility, and not suitable for project market, especially industrial applications. But now, with a brand new GUI design which is comparable to VMS client, IVSS can provide a user experience familiar and friendly for project level customers. IVSS have unified the GUI design for both local and Web, makes it easier to learn how to use the device.

**PC client**

- No more worry about
  - Update of Browser
  - Incompatible Plug-ins
  - Farfetched HTML5
  - Flash Incompatible

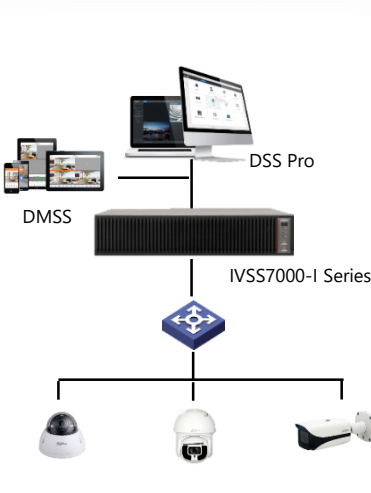

### Optional Models

- Face Recognition**
  - Each AI module support
    - Up to 6 channel video stream (1080P)
    - Up to 20 face pictures /sec picture stream
  - Face database
    - Support 50 databases with up to 300,000 face images
- Perimeter Protection**
  - Each AI module support
    - Up to 16 channel perimeter protection
    - 10 IVS rules for each channel
- Metadata**
  - Each AI module
    - Up to 4 channel video metadata
    - 30 properties/module

### Perimeter Protection Solution

**Application Scenes**

- Airport
- Railway
- Highway
- School
- Power Station
- Prison
- Border
- ...

Perimeter protection by recorder: Up to **256** channels

**Product Selection**

Cameras	Normal Dahua IPC/ Third Party Camera
Storage	IVSS7000-I Series
VMS	DSS Pro

### Face Recognition Solution

**Application Scenes**

- Airport
- Mall
- Bank
- School
- Stadium
- ...

Face recognition with face capture camera: Up to **256** channels  
Face recognition with normal camera: Up to **96** channels

**Product Selection**

Cameras	Face Capture Camera: IPC-7 Series, IPC-5 Series, IPC-8242-FD Series Normal Camera: Normal Dahua IPC/ Third Party Camera
Storage	IVSS7000-I Series
VMS	DSS Pro
